## ENTREPRENEURSHIP DEVELOPMENT CELL (EDC)

### Event Summary

Entrepreneurship Development Cell (EDC) of Vidya Jyothi Institute of Technology (VJIT) has arranged Industrial visit to Association of Lady Entrepreneurs of India (ALEAP), Centre for Entrepreneurship Development (CED), Hyderabad on 16<sup>th</sup> January 2017 for ED Cell Faculty members. The Program aims to provide opportunities to Undergraduate students, Postgraduate students and Faculty Members to build up their capability in the area of Entrepreneurship.

The Industrial Visit had given more exposure to faculties in the area of Facilitator Business Development, Aleap Credit Guarantee Association, Vipani and Incubators.

**Sub: Invitation to deliver the key note address.**

Dear Vikram Mishra,

This refers to the telephonic discussion I had with you on the above subject.

The VJIT – ED Cell is privileged to invite you to deliver the “KEY NOTE ADDRESS” on “Entrepreneurship” to our students.

Date: 27-08-2016

Venue: VJIT

Time: 11.00 AM

Please confirm your suitability of the date, time and venue.

Best Regards

One day workshop for non-teaching staff on “**Accident Prevention in Electrical and Safety Procedures**”

## Report

**Department:**

Electrical and Electronics Engineering

**Academic Year:**

2016 - 2017

**Event Date:**

Monday, October 15, 2016.

**Event Category:**

Training programme for non-teaching staff

**Event Venue:**

N-Block

**Target Audience:**

Non-teaching staff of EEE dept.

**Number of Audience:** 4

**Event Report:**

Mr.K. DhanaRaju, PLC trainer delivered a workshop on **Accident Prevention in Electrical and Safety Procedures**. He spoke about how Industrial work is somewhat known for its risk for injury. However, it's still not something people often think about when actually doing the work that risks so much injury in such a substantial way. There are various ways injuries can happen when doing industrial work.

The most common cause is due to electricity. In 2015 alone, electrical hazards caused 134 workplace fatalities and 2,480 injuries that resulted in lost work days. Electrocutation is the sixth most common cause of workplace deaths in the United States. Despite the statistics, preventive measures are insufficient and electrical hazards continue to cause injuries and deaths.

A worker suffers from electrical injury when he or she becomes one with an electrical circuit. It's a terrifying concept, but an accurate representation of how an electrical injury occurs. The

*A. Kumar*  
PRINCIPAL  
Vidya Jyothi Institute of Technology  
Himayatnagar (Vill), C B. Post,  
Hyderabad-75.

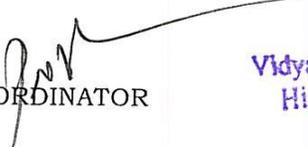

Canadian Centre for Occupational Health and Safety notes that human beings are incredibly conductive and electricity will flow through us if there is no other easy path.

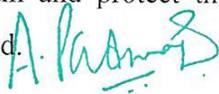

Also, he spoke about Electrical injuries can occur in many ways, such as when a worker comes into contact with an exposed electric conductor or part of a circuit. This can cause heart problems, muscle spasms, and loss of breath. Injury can also result if electricity is passed from a conductor or circuit through a gas and into a grounded worker. This type of injury is more serious and can often end in death. Additionally, workers can be burned by electrical fires or fall from heights after being shocked.

Here are some tips to help keep electrical injuries from happening in the workplace.

1. Always identify any electrical hazards before starting work. These hazards should be labelled clearly so anybody passing by can easily identify them.
2. Always keep your equipment away from energy sources. On top of that, only ever use equipment specifically made for the job at hand.
3. Use non-conductive ladders to keep from being shocked at large heights. This can help prevent falls, as well.
4. Be wary of outlets that are hot to the touch. This may indicate bad wiring and could result in an electrical fire.
5. Never nail or staple extension cords into place. Only ever use electrical tape for this purpose. Damaged cords can lead to electrical fires and shocks. Because of this, you should also thoroughly inspect all electrical cords before use and never use a cord that shows signs of damage.
6. Always wear proper protective clothing and use insulated tools when around electrical hazards.

These preventative measures may seem like overkill, but the truth is that you can never be too safe when it comes to electrical injury. With such heavy statistics showing how many people can die from such hazards, businesses should take great care to protect their workers. If workplaces were to properly train and protect their employees, the number of electrical injuries would be greatly decreased.

Also, he stressed upon 5 key factors to the correct cable selection and application  
 The key to the successful operation of a cable system is **to select the most suitable cable for the application**, make a correct installation, and perform the required maintenance.  
 In this technical discussion is based on the correct cable selection and application for power distribution and utilization.  
 He spoke about Five key factors to the correct cable selection and application

**Cable selection can be based upon the following five key factors:**

1. Cable installation
2. Cable construction
3. Cable operation (voltage and current)
4. Cable size
5. Shielding requirements

**Installation and Commissioning Includes**

Sr.No	Description

17<sup>th</sup> August 2016

Report on

## Training program on MATLAB Tool

Department of ECE conducted training on MATLAB Tool on 11<sup>th</sup> and 12<sup>th</sup> August 2016. The sessions were conducted by A. Jaya lakshmi, Assistant professor, VJIT, Hyderabad and Y. Aruna, Assistant professor, VJIT, Hyd for non-teaching staff.

A. Jayalakshmi speaker for the first day session has given the overview of Matlab Coding. During this session the following points were discussed:

- Introduction Matlabcoding.
- Understanding the various loops and if else rules.

Second day session was carried out by Y. Aruna. In this session staff practiced some sample programs and verified the results

The objectives of the program are:

- To create awareness on matlabcoding for technical staff of the simulation lab.
- To encourage the faculty to use matlab.

Outcomes of the programme:

- Attendees are able to understand how to code in matlab.
- Understand the step by step procedure.
- Gained knowledge on Matlabcoding.

Number of non-teaching faculty members attended for this programme is 7.
