Best of Practice II:

Title of the practice: PRAYUKTHI-Initiative to improve Employability, Entrepreneurship and Higher Education among SC/ST students Prayukthi is an initiative taken in the year 2016 to help the students coming from reserved categories (SC/ST), so that they can stand strong. PRAYUKTHI in VJIT is considered as best practice as because from the inception, this initiative is creating a significant change in the learning and development of the reserved category students. Most of the SC/ST students have vernacular back ground of villages, other states etc. Besides communication, having a recap and on time memory of the academic concept is a big challenge for them. Students are not aware of the skills required for employability. Hence in VJIT we initiated this scheme to motivate and improve SC/ST students.

Objectives:

1. To motivate SC/ST students for higher education, government jobs and other professional jobs.
2. To train the SC/ST students for exercising expertise in the area of soft skills, communication skills, interpersonal skills and preparing them to face interviews and get better placement.
3. To provide study material for all competitive examinations prepared by experts.
4. To access all the desired resources required for students and interact with faculty members beyond the class work
5. To transform the passive learners to active learners and reproduce knowledge.
6. To support financial assistance to needy students by the College management and forum.
7. To conduct seminars and guest lectures by experienced faculty and HRs from industry.
8. Involve the student's right from first year to final year to understand the importance of career building, industrial jobs and entrepreneurship.
9. To become confident in taking assessments and final certifications related to skills required.

1.5

Curriculum

1.5.1

Curriculum Development Process

VJIT aims to design learning as a pedagogical approach, combining learning effectiveness to enrich participative opportunities in the classroom, with technologically enhanced active learning possibilities. We aim at excellence in Technical Education through continual improvements and are committed to provide responsible technocrats for effective nation building. VJIT is committed to provide a positive and professional learning environment where all students are inspired to strive for excellence in becoming competent engineers, technology innovators and leaders in a global society. This we plan to achieve through a cohesive network of parents, alumni, students, institute teachers and industry partners.

The Curriculum is designed with courses such that students by the time of graduation acquire expertise in several aspects like technical knowledge, application of knowledge, analysis and solutions to the societal problems, usage of advanced automated software and tools, translating knowledge to meet current needs of industries & society. The college follows OBE model for curriculum design and implementation based on predefined objectives and course outcomes. OBE guidelines reflect various life cycle phases related to continuous quality improvements along with planning, implementation, assessment, evaluation and execution.

For successful design, development and implementation of the dynamic curriculum for all the programmes offered, the institution follows a systematic process and implements it effectively. To meet the global challenges, many initiatives have been taken up in the curriculum. The major plans in all aspects are discussed in the Board of Studies followed by College Academic Council consent and then it will be approved in BoG.

Being an Autonomous Institution, salient features of the Curriculum

1. CBCS Implemented
2. Mandatory courses introduced in 2nd year
3. Professional Communication in 2nd year

The Curriculum Design and Development ensures that the students are Employable, Innovative and are also able to contribute towards Research.

Emphasis is given to improve **Employability** skills of students by introducing new courses in our curriculum. The curriculum and syllabus are designed to meet industry expectations which have various aspects including Analytical Problem-Solving Skills, Social Awareness along with Core Subject knowledge. Various Core, Interdisciplinary Open Electives and Generic subjects are introduced to make sure students can get ready for employment.

To inculcate **Innovative** ideas among student's the institute included Interdisciplinary electives in curriculum as open electives to nurture multi-disciplinary approach for solving problems in innovative ways along with professional electives and generic electives. To execute their innovative ideas exclusive labs and the various Center of Excellences are setup.

The curriculum also helps students to focus on research as all programmes offer number of elective courses (core, open, generic) to train and motivate learners to inculcate research attitude and to develop research orientation. Specialized courses and professional electives help students to implement their research ideas.

The Institute with committed focus has designed and developed the curriculum to address the needs of the society. The required data is collected through formal as well as informal feedback from various stakeholders like students, alumni, employers, academia experts, industry persons, parents at regular intervals. The institute considers these suggestions and recommendations given by various stakeholders for design and re-design of curriculum.

Analysis of feedback is done based on the need of the society, the summarized suggestions provide the input for taking necessary action and changing curriculum during BoS meetings. The curriculum is upgraded as per the stakeholders’ inputs to create and nurture competent engineers and managers who would be enterprise leaders globally with strong value-based education.

1.5.2 Teaching Learning Process

The Teaching-Learning processes at VJIT have gained significance with the inception of student-centric learning. VJIT has embraced the student-centric teaching methodology in the autonomous curriculum with emphasis on hands-on-learning, the ICT enabled learning along with the regular teaching processes has been adopted to engage students.

Power point presentations are used in the classrooms to provide audio visual experience to the students. The NPTEL video lectures are also adopted for enhanced learning while the “Think-Pair-Share” methodology is implemented for cooperative learning in the classrooms. Quizzes are conducted regularly, and assignments are given to the students to nurture their problem-solving abilities. The Project Based Learning is adopted for the self-study components from 3rd semester onwards. The project allocation, monitoring and evaluation system is in place and is running effectively under senior faculty guidance. A rubric for project evaluation which covers all the quality criteria is also well maintained. Effectively designed open-ended experiments are adopted to challenge the student’s critical thinking, analysis and design capabilities. The students are also trained on modern simulation tools. The industry visits, site visits, guest lectures etc. are conducted regularly on the latest topics and trends in the industry. Hands-on workshops by the industry experts are organized regularly. The final year Projects are evaluated by external experts using a well-defined detailed rubric framework to ensure quality of the projects and the best projects are awarded prizes. Value added courses are undertaken on various relevant topics. The students are also trained in abstract writing, technical paper writing and literature survey. OBE is practiced in true spirit resulting in more focused all-round development of our students.

Modern Tool Usage: All classrooms are equipped with LCD projectors facilitating faculty to take classes and students to present their project/research work in classroom. YouTube based E-tutorials developed by faculty assist students in comprehending the concepts and enable

students to replay in clearing doubts at specific bottleneck points. Technology is used for enhancing the learning ability of the graduates

Industry-Institute-Interaction: College has Industry-Institute Interaction Cell with coordinators at department level who work with representatives of various industries and train the students in their respective areas. The partnering industries provide internships, projects, and subsequently provide job offers to some of our students.

Student Support System: Participation of students in inter-college Hackathons and the prizes won by them is authentication of the support given from the Institute. The departments have also adopted many best practices with student centric methods. Remedial classes for the slow learners are conducted regularly. The Institution has several Student Clubs with an aim to inculcate the culture of innovation and encourage them to generate new ideas. The Institution ensures overall development of students through participatory learning experience.

VJIT takes responsibility in supporting student talent management, facilitating trainings in applied learning tasks focusing on short-term and long-term goals in areas of student development. The committed guidance never deteriorated even during tough times by ensuring continuity in learning through:

1. Webinars delivered by IUCEE and IITB Remote Center
2. Cloud Technology is expended in using Google forms by faculty to conduct online assignments.
3. Students presented progress of their project work by using ICT enabled tools and exhibiting their models to faculty.
4. The flipped classroom teaching advanced ability to prepare lectures and presentation. The query answering trait got improved among students by employing ICT tools.
5. The teaching methods facilitated in suppressing passive mode among slow learners and improved their proactiveness.

Academic Calendar is prepared before the commencement of academic year and will be approved in the academic council. Two semesters each with 90 working days are formulated for UG and PG programmes. The calendar clearly illustrates the duration of Classwork, Mid and End Examinations. The calendar is disseminated to students and faculty through circulars, display in notice boards, posting in website etc.

Once the calendar is released the other connecting academic activities take initiation in each of the departments. The Head of the Department allocates the courses to faculty members who in turn prepare the course outcomes (CO) for assigned courses. The faculty further maps the COs with POs and PSOs employing the numeric weightages/ratings.

The teaching plan also envisages the value-added courses to cater to the needs of students preparing them to match their skills to industry requirements without any further training.

The continuous evaluation is also planned in the semester at appropriate time periods such that the faculty can conduct assignments & mid examinations in the stipulated slots.

The teaching plan prepared comprises of Blooms Level Taxonomy associated questions with an objective to test the cognitive skill levels of our students. The teaching plan envisages the evaluation procedure for answer scripts, seminar reports, project reports and will be carried by appropriate rubrics prepared initially at the commencement of the semester.

1.5.3

1.7.5 Mentor System

VJIT believes that mentoring system has a positive impact on student achievement. Hence, it has adopted effective mentoring system for the development of its students. Our experienced faculties establish a positive and constructive relationship with the students to foster their personal and professional growth.

Our mentoring system has shown a tremendous change in the students' ability to reach their goals and realize their dreams. This was possible by maintaining a positive classroom atmosphere, in which the faculty are quite approachable to the students and they successfully reinforce learning skills by alleviating students' mental blocks. The students have always looked up to our faculty who has been serving as role models sharing their personal experiences and history of their careers.

1. The results achieved by our students are a perfect example of our sound mentoring system; the results being both output and outcome-based.
2. Increasing student attendance percentage is yet another milestone in our mentoring system.
3. Students' keen interest in curricular, co-curricular and extra-curricular activities, their active participation in various student clubs to enhance their personality is another achievement of our robust mentoring system.

VJIT also promotes psychosocial mentoring system to boost the confidence levels of its future professionals. Our able faculty serves as a consistent source of advice and support to the students to build self-confidence and self-esteem by motivating an open talk about their fears and anxiety that hinder their concentration on academics. A deep insight into the multiple backgrounds of the students that inflict their academic development has helped us to counsel them to overcome their insecurities. This has been a focal point of our strong and efficacious mentoring system. Another major area of focus in mentoring system is the academic/career factor. We have been active listeners to the students who project a plethora of ideas and have been extending our support to them in exploring a range of opportunities and possibilities, thereby strongly supporting them in critical decision-making. It is our primary responsibility to explore suitable, sustainable academic and career options hand-in-hand with the students and helping them overcome their stigma about their abilities. The motto of our mentoring system is the viable student-faculty interaction for a persistent development of our students.

Mentoring system to help at individual level:

Types of mentoring:	All round mentoring
Frequency of Meetings:	Fortnight (and need based)

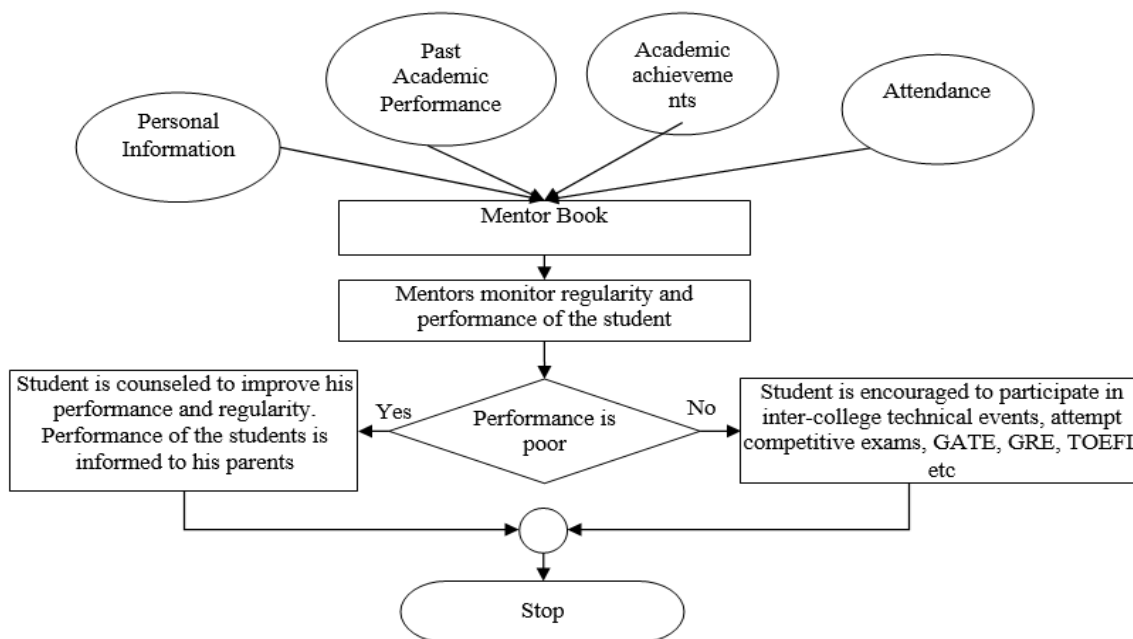

Mentoring process

Mentoring is for overall development of the student. Counseling books are maintained by faculty where all details of the students are recorded. The following details are maintained in the counseling book of each student:

1. Personal Information
2. Past Academic Performance
3. List of academic achievements
4. Monthly attendance

The mentors will meet the students periodically and monitor their performance and their progress. Guidance is given to students for the improvement. The followings are take care by each mentor.

1. Monitoring Regularity of the students.
2. Monitoring Performance of the students.
3. Personal Counseling for Career Guidance
4. The parents of poorly performing students are informed through SMS and call.
5. Students are encouraged to participate in technical events.

SOCIETY OF PHOTO-OPTICAL INSTRUMENTATION ENGINEERS (SPIE)

SPIE, the international society for optics and photonics, was founded in 1955 to advance light-based technologies. The SPIE international office is located in Bellingham, Washington and the SPIE Europe office is located in Cardiff, Wales.

The not-for-profit society advances emerging technologies through interdisciplinary information exchange, continuing education, publications, patent precedent, and career and professional growth serving 255,000 constituents from 183 countries.

VJIT-SPIE Chapter Establishment

On 18 October 2012, an official approval from SPIE was granted and our student chapter was formed. It was decided to have scheduled weekly meetings in order to discuss developments and progress in various fields of interest to the members.

OPTICS EDUCATION AND OUTREACH

The student members came up with fun experiments, easy activities, interesting facts and other resources related to optics for the kids. At the end of the event a quiz was conducted and optical kits were given out to kids who answered correctly. This was mainly to increase their enthusiasm and interest towards optics and photonics. Posters and optical kits were also left with the schools for future use by kids. We received a good response from the kids.

VJIT-SPIE students/ teachers at ACTS School during outreach program

School children educated and trained to demonstrate the chromatic nature of white light with the experimental setups received from SPIE

SPIE student member demonstrating optics phenomena like partial reflection of light using outreach kit. School students were keen to observe the multiple paths of laser beam transmitted and reflected from the various mirrors in the setup.

School children actively participating in the demonstration of splitting of white light into VIBGYOR colors using rainbow peephole

Students made to understand the basic principles of physics instruments used in the school laboratory.

Inhouse Research Activity carried out in Physics Laboratory

Experimental work being carried by the VJIT-SPIE student's in the optics lab of VJIT. The variation of optical properties of solutions and thin films with different compositions are some of the studies carried out by the students

Visiting Lecture

High school students visit to VJIT laboratories

School students from different places invited to VJIT-SPIE, educated and trained them in various fields of optics with insight to the practical applications of optics, recent trends and scope of optics education.

1.9 Training and Placement Activities

the company and a mutually convenient date are fixed for the Campus Placement process. Training is one of the core parts of Training and Placement Cell. Below are the topics in which we train our students so that they are industry ready:

1. Technical Training on subjects like C, JAVA, DBMS, SQL ETC
2. Soft Skills Training
3. Aptitude Training
4. Professional Resume Writing
5. Mock Interviews
6. Skill Development Sessions
7. Group Discussion sessions
8. We also invite Guests from Industry and arrange seminars on skill development and technical talks, and many other topics. The main objective to conduct these seminars by industry professionals is to bridge the gap between Industry and Academia.

Campus Placement Procedure:

1. Invitations are sent to companies/organizations in the form of brochures with relevant information along with response sheets enquiring about the recruitment details. Soft copies of the brochure and response sheet are also sent.
2. The company fills the response sheet and sends it by e-mail/post to the Training and Placement Department, VJIT
3. Once the details are received, the placement officer and coordinators get in touch with

Our Major Recruiters:

1.B Research and Development Activities

1.10 Research Promotion Policy

RESEARCH PROMOTION POLICY

VJIT grooms’ innovations and research as stepping stone of development in key areas of Engineering and Management. The Main aim of Research & Development Centre at the Institution level is to promote Research & Innovation among the faculty & students that helps for a social cause. Dr. Satya Narayana, Department of Mechanical Engineering Engineering is the Institutional Research Co-ordinator of the Centre. The R&D Centre of the college works in three distinct aspects viz., pursuing Academic and sponsored research, bringing innovation from engineering and imparting standards among all the research pursued. To promote research and innovation, many new centres of excellence and innovative labs have been established. The best research practices and ideas are shared amongst departments. R&D Center involves in identifying thrust areas on research, developing projects leading to publications in National/International Journals and conferences. The centre helps in developing co-operative and complimentary research among various Departments under VJIT to explore advanced technologies. The Centre holds periodical Review meetings on the progress of research being carried out by staffs and students. The Center also renders help to pursue funded projects once it is sanctioned. The Centre also guides in writing projects, to culminate in filing patents.

Treading this path, the Institution evinced interest in research amongst the students from first year of their study. Necessary environment and facilities were created. Centralized labs/design centers titled propel labs were established. These labs are broad based and not confined to a single area/discipline. Student groups (multidisciplinary) work on various engineering projects in these labs - concept to designing the prototype. The labs are open for students of all disciplines. Each Lab is headed by a faculty and supported by competent

technical staff who volunteers to act as mentors for the students and ensure that students conduct the research. Creative thinking skills of the students and mentoring by faculty guides result in development creating systematic processes and products. These research labs help the students to build prototypes which enable them to participate in competitions both in India & Abroad.

The aims and objectives of VJIT Research & Development Centre is enumerated hereunder:

1. Encourage Faculty and students to take up research
2. Monitor activities of centers of excellence/innovative labs/incubation centers
3. Collaboration with foreign universities for Research activities
4. Facilitate management grants/incentives for promoting research
5. Assist in patenting
6. Conducting research conclaves

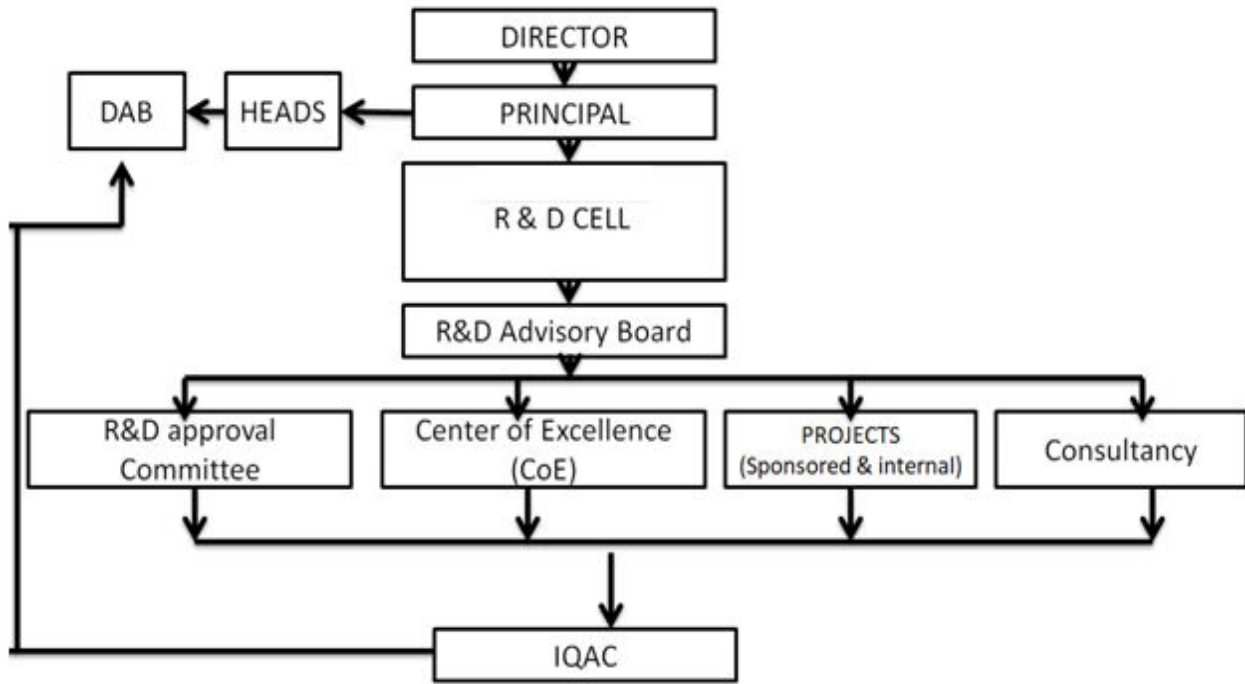

Some of the unique research facilities created are shown hereunder:

1. VLSI Laboratory
2. 3D Printing Lab
3. Internet of Things (IOT)
4. Centre of Excellence in Data Analytics in association with Qliq,

The institution has introduced number of Initiatives towards Promoting Research activities in the institution.

1. Cash incentives for research publications in refereed journals
2. Deputation of faculty to participate in workshop, seminar and conferences
3. Financial assistance to faculty for presenting technical papers in national, international conferences/seminars
4. Centers of excellence/Innovative labs/Incubation centers
5. Incentives for faculty for fetching external research grants
6. Supporting measures for patent filing
7. Continuous augmentation of labs with state of art equipment and software
