## II B.TECH-I SEM

### A13012. MATHEMATICS-IV

(SPECIAL FUNCTIONS AND FUNCTIONS OF A COMPLEX VARIABLE)

#### COURSE OUTCOMES

<b>C201.1</b>	Residue Theorem Identify Bessel equation and solve it under special conditions with the help of series solutions method. Also recurrence relations and orthogonality properties of Legendre polynomials.
<b>C201.2</b>	Analyze the complex functions with reference to their analyticity, Integration using Cauchy's integral theorem,
<b>C201.3</b>	Expansion of a given function as a Taylor's
<b>C201.4</b>	Expansion of a given function as a Laurent series
<b>C201.5</b>	Solving Real Definite Integrals using Cauchy's.

### A13401. ELECTRONIC DEVICES AND CIRCUITS

#### COURSE OUTCOMES

<b>C202.1</b>	Understand and Analyze the different types of diodes, operation and its characteristics
<b>C202.2</b>	To analyze and design diode application circuits like rectifiers, filters.
<b>C202.3</b>	Understand and Analyze the operation and characteristics of BJT and FET.
<b>C202.4</b>	Design and analyze the DC bias circuitry of BJT and FET,
<b>C202.5</b>	Design biasing circuits using diodes and transistors

### A13402. SIGNALS AND SYSTEMS

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

---

## Department of Electronics and Communication Engineering

(Accredited by NBA)

### R22 REGULATION CO STATEMENTS

---

#### COURSE OUTCOMES

<b>C203.1</b>	Represent any arbitrary signals in terms of complete sets of orthogonal functions and understands the principles of impulse functions, step function and signum function.
<b>C203.2</b>	Express periodic signals in terms of Fourier series and express the spectrum and express the arbitrary signal (discrete) as Fourier transform to draw the spectrum.
<b>C203.3</b>	Understands the principle of linear system, filter characteristics of a system and its bandwidth, the concepts of auto correlation and cross correlation and power Density Spectrum and can design a system for sampling a signal.
<b>C203.4</b>	For a given system, response can be obtained using Laplace transform, properties and ROC of L.T
<b>C203.5</b>	Study the continuous and discrete signal relation and relation between F.T., L.T. & Z.T, properties, ROC of Z Transform.

#### **A13403. SWITCHING THEORY AND LOGIC DESIGN**

#### COURSE OUTCOMES

<b>C204.1</b>	Manipulate numeric information in different forms, e.g. different bases, signed integers, various codes such as ASCII, Gray and BCD.
<b>C204.2</b>	Manipulate simple Boolean expressions using the theorems and postulates of Boolean algebra and to minimize combinational functions.
<b>C204.3</b>	Design and analyze small combinational circuits
<b>C204.4</b>	To use standard combinational functions/building blocks to build larger more complex circuits.
<b>C204.5</b>	Design and analyze small sequential circuits and devices and to use standard sequential functions/building blocks to build larger more complex circuits.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

### R22 REGULATION CO STATEMENTS

---

#### **A13404. ELECTRONIC MEASUREMENTS AND INSTRUMENTATION**

##### **COURSE OUTCOMES**

<b>C205.1</b>	Describe the fundamental concepts and principles of instrumentation explain the operations of the various instruments required in measurements.
<b>C205.2</b>	Apply the measurement techniques for different types of tests and to select specific instrument for specific measurement function.
<b>C205.3</b>	Understand principle of operation, working of different electronic instruments like digital multi meter, vector voltmeter.
<b>C205.4</b>	Learners will apply knowledge of different oscilloscopes like CRO, DSO and will understand functioning, specification, and applications of signal analysing instruments.
<b>C205.5</b>	Students will understand functioning, specification, and applications of signal analysing instruments

#### **A13405. PROBABILITY THEORY AND STOCHASTIC PROCESS**

##### **COURSE OUTCOMES**

<b>C206.1</b>	Demonstrate knowledge in Probability theory Single and multiple random variables
<b>C206.2</b>	Random processes and their characteristics
<b>C206.3</b>	Analyze operations on single and multiple random variables and processes.
<b>C206.4</b>	Will be able to compute: Least -square & maximum likelihood estimators for engineering problems. Mean and covariance functions for simple random processes.
<b>C206.5</b>	Design solutions for complex engineering problems involving random processes.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

#### **A13481. ELECTRONIC DEVICES AND CIRCUITS LAB**

##### **COURSE OUTCOMES**

<b>C207.1</b>	To Identify and use the basic components of basic components of electronics laboratory
<b>C207.2</b>	To understand and use the basic instrument of the laboratories used in measurements
<b>C207.3</b>	To Understand and show the characteristics and applications of Diode
<b>C207.4</b>	To identify and produce the characteristics and applications of transistors
<b>C207.5</b>	To identify and produce the characteristics and applications of FETs

#### **A13482. BASIC SIMULATION LAB**

##### **COURSE OUTCOMES**

<b>C208.1</b>	To Quantify and verify the various operation on signals.
<b>C208.2</b>	To Analyze and implement the convolution and correlation on signals.
<b>C208.3</b>	To understand and analyze the transforms on signals and systems.
<b>C208.4</b>	To find power spectrum of a given signal
<b>C208.5</b>	To study and implement the noise removal on periodic signal.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

## Department of Electronics and Communication Engineering

(Accredited by NBA)

### R22 REGULATION CO STATEMENTS

---

## II B.TECH-II SEM

### A14211. PRINCIPLES OF ELECTRICAL ENGINEERING

#### COURSE OUTCOMES

<b>C209.1</b>	The knowledge on transient analysis of circuits
<b>C209.2</b>	The basic two-port network parameters and the design analysis of the filters and attenuators and their use in the circuit theory.
<b>C209.3</b>	The operation of DC machines
<b>C209.4</b>	The operation of DC transformers
<b>C209.5</b>	Able to apply the above conceptual things to real-world problems and applications.

### A14409. ELECTRONIC CIRCUIT ANALYSIS

#### COURSE OUTCOMES

<b>C210.1</b>	Design and analyze small signal amplifier circuits applying the biasing techniques learnt earlier.
<b>C210.2</b>	Cascade different amplifier configurations to obtain the required overall specifications like Gain, Bandwidth, Input and Output interfacing Impedances.
<b>C210.3</b>	Design and realize different classes of Power Amplifiers and tuned amplifiers useable for audio and Radio applications.
<b>C210.4</b>	Utilize the Concepts of negative feedback to improve the stability of amplifiers
<b>C210.5</b>	Utilize the Concepts of positive feedback to generate sustained oscillations.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

## Department of Electronics and Communication Engineering

(Accredited by NBA)

### R22 REGULATION CO STATEMENTS

---

#### **A14410. PULSE AND DIGITAL CIRCUITS** **COURSE OUTCOMES**

<b>C211.1</b>	Understand the applications of diode as integrator, differentiator, clippers, clamper circuits.
<b>C211.2</b>	Learn various switching devices such as diode, transistor, SCR.
<b>C211.3</b>	Difference between logic gates and sampling gates.
<b>C211.4</b>	Design mutivibrators for various applications, synchronization techniques and sweep circuits.
<b>C211.5</b>	Realizing logic gates using diodes and transistors.

#### **A14411. ELECTROMAGENETIC THEORY AND TRANSMISSION LINES** **COURSE OUTCOMES**

<b>C212.1</b>	Study time varying Maxwell's equations and their applications in electromagnetic problems.
<b>C212.2</b>	Determine the relationship between time varying electric and magnetic fields and electromotive force.
<b>C212.3</b>	Analyze basic transmissions line parameters in phasor domain.
<b>C212.4</b>	Use Maxwells equations to describe the propagation of electromagnetic waves in vaccum.
<b>C212.5</b>	Show how waves propagate in Dielectrics and lossy media and Demonstrate the reflection and refraction of waves at boundaries.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

### R22 REGULATION CO STATEMENTS

---

#### **A14412. DIGITAL SYSTEM DESIGN**

##### **COURSE OUTCOMES**

<b>C213.1</b>	Describe Verilog hardware description, languages(HDL) and Design digital circuits.
<b>C213.2</b>	Write Behavioural models of digital circuits and Write Register Transfer Level (RTL) models of Digital Circuits.
<b>C213.3</b>	Verify Behavioural and RTL models and Describe standard cell libraries and FPGAs
<b>C213.4</b>	Synthesize RTL models to standard cell libraries and FPGAs
<b>C213.5</b>	Implement RTL models on FPGAs and Testin and Verification

#### **A14016. ENVIRONMENTAL SCIENCE**

(Common to all Branches)

##### **COURSE OUTCOMES**

<b>C214.1</b>	Understand the importance of Ecosystem and its Resources.
<b>C214.2</b>	Be aware on the Variety of Living organism and the need to conserve them.
<b>C214.3</b>	Understand the impacts of Developmental Activities.
<b>C214.4</b>	Understand the Environmental Policies, Management Plan and Regulations.
<b>C214.5</b>	Sensitize on a Sustainable Future.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

#### **A14485. ELECTRONIC CIRCUITS AND ANALYSIS LAB**

##### **COURSE OUTCOMES**

<b>C215.1</b>	To Implement and verify the response of small signal Amplifiers
<b>C215.2</b>	To Identify and illustrate the time response of oscillators
<b>C215.3</b>	To Prepare and summarize the response of power amplifiers
<b>C215.4</b>	To illustrate and show the frequency of oscillations of tune amplifiers.
<b>C215.5</b>	To Implement and verify the response of various feedback amplifiers

#### **A14486. PULSE AND DIGITAL CIRCUITS LAB**

##### **COURSE OUTCOMES**

<b>C216.1</b>	To Understand and implement the Linear wave shaping circuits
<b>C216.2</b>	To Understand and implement the Non-Linear wave shaping circuits
<b>C216.3</b>	To Analyze and design the different multivibrators
<b>C216.4</b>	To Recite and relate the relaxation oscillator
<b>C216.5</b>	5.To design and analyze switching characteristics of a BJT.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

## III B.TECH- I SEM

### A15413.ANALOG COMMUNICATIONS

#### COURSE OUTCOMES

<b>C301.1</b>	Understand the importance of probability theory and the properties of Fourier Transform for the Analysis of Analog Communication Systems.
<b>C301.2</b>	Interpret the Time and Frequency domain analysis of different analog modulation Schemes
<b>C301.3</b>	Analyze the given communication system for computing the transmission bandwidth, Power requirement based on the used modulation schemes.
<b>C301.4</b>	Design and Utilize different modulation and demodulation schemes used in Real time.
<b>C301.5</b>	Differentiate the various divergent noise and its effects on analog modulation schemes, also the various types of receiver characteristics.

### A15414. LINEAR AND DIGITAL IC APPLICATIONS

#### COURSE OUTCOMES

<b>C302.1</b>	Ability to elucidate the characteristics of ideal and practical operational amplifier
<b>C302.2</b>	Apply knowledge of mathematics to analyze operational amplifier in inverting and non-inverting configuration modes and develop the applications of IC 741.
<b>C302.3</b>	Examine and infer the functionality of 555 timer and 565 PLL Integrated circuits.
<b>C302.4</b>	Interpret the concepts and features of Analog to Digital and Digital to Analog converter in Integrated circuits form.
<b>C302.5</b>	Evaluate the various Combinational and sequential logic using 74XX Digital Integrated circuits.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A15415. CONTROL SYSTEMS ENGINEERING**

##### **COURSE OUTCOMES**

<b>C303.1</b>	Demonstrate and understand the fundamentals of control systems.
<b>C303.2</b>	Determine and use models of physical systems in different forms suitable for use in the analysis and design of control systems.
<b>C303.3</b>	Relate the time and frequency-domain responses of first order systems to step and sinusoidal inputs.
<b>C303.4</b>	Relate the time and frequency-domain responses of second-order systems to step and sinusoidal inputs.
<b>C303.5</b>	Examine the stability of a closed-loop control system

#### **A15416. COMPUTER ORGANIZATION AND ARCHITECTURE**

(Professional Elective-I)

##### **COURSE OUTCOMES**

At the end of the course the student should be able to

<b>C304.1</b>	Recall the structure and organization involved in digital computer design.
<b>C304.2</b>	Identify the different memory and input- output system involved in system design.
<b>C304.3</b>	Understand the basics of computer organization
<b>C304.4</b>	Understand the design on program control and computer arithmetic operations.
<b>C304.5</b>	Comprehend the various details of multiprocessor in computer design

#### A15419. INTRODUCTION TO MICROCONTROLLERS AND APPLICATIONS

(Open Elective – I)

##### COURSE OUTCOMES

<b>C305.1</b>	Interpret the internal organization of 8051 with its unique features.
<b>C305.2</b>	Infer and give examples about the various addressing modes, instruction formats and instructions of 8051.
<b>C305.3</b>	To understand the various interfacing techniques pertaining to system design.
<b>C305.4</b>	Construct the hardware and software interaction with each other using programming.
<b>C305.5</b>	Summarize the features of the advanced architecture using ARM controller.

#### SMART CITY (SC)

##### COURSE OUTCOMES

<b>C305.1</b>	Understand the necessity of smart infrastructure and to promote cities that provide quality of life to citizens.
<b>C305.2</b>	Explain technology-based solution on smart mobility.
<b>C305.3</b>	Illustrate & introduce the smart and sustainable waste and water management for smart cities.
<b>C305.4</b>	Evaluate economical models for smart infrastructure solution.
<b>C305.5</b>	Create healthy and waste ridden environment.

#### **ELEMENTS OF MECHANICAL ENGINEERING (EME)**

##### **COURSE OUTCOMES**

<b>C305.1</b>	Understand the basic concepts of mechanical engineering.
<b>C305.2</b>	Applying principles of engineering mechanics in mechanism and machines
<b>C305.3</b>	Develop manufacturing methods to produce engineering components.
<b>C305.4</b>	Evaluating alternative designs for the engineering components
<b>C305.5</b>	Comparing various standards relevant to automobiles.

#### **PRODUCT ENGINEERING (PE)**

##### **COURSE OUTCOMES**

<b>C305.1</b>	Identifying scheduling techniques for project management.
<b>C305.2</b>	Designing the products and their life cycles.
<b>C305.3</b>	Generating the products with different material requirements.
<b>C305.4</b>	Conceptualization the products with their drawings for standardization.
<b>C305.5</b>	Evaluating the life of the products by conducting various tests.

#### **JAVA PROGRAMMING(OPEN ELECTIVE)**

##### **COURSE OUTCOMES**

<b>C305.1</b>	Apply OOP concepts in Java Programming
<b>C305.2</b>	Analyze the concepts of JAVA programming for problem solving
<b>C305.3</b>	Evaluate the concepts of packages and interfaces in java
<b>C305.4</b>	Analyze the usage of Exception Handling and Multithreading in complex Java programs
<b>C305.5</b>	Create GUI Applications and Applets

#### **OPERATING SYSTEMS(OPEN ELECTIVE)**

##### **COURSE OUTCOMES**

<b>C305.1</b>	Understand the functions of Operating Systems.
<b>C305.2</b>	Evaluate various process scheduling algorithms.
<b>C305.3</b>	Analyze various memory allocation techniques for effective utilization of memory.
<b>C305.4</b>	Evaluate various file concepts for effective storage.
<b>C305.5</b>	Analyze the concepts of deadlocks.

#### **TOTAL QUALITY MANAGEMENT (TQM)** **COURSE OUTCOMES**

<b>C305.1</b>	To explore the quality framework in production and operational aspects.
<b>C305.2</b>	To evaluate the role of quality in product design and analysis.
<b>C305.3</b>	To analyze quality in process improvement and modern production management tools.
<b>C305.4</b>	To understand the role of TQM tools and techniques in elimination of wastages and reduction of defects
<b>C305.5</b>	To analyze the requirements of quality management system.

#### **REMOTE SENSING& GIS (RS&GIS)** **COURSE OUTCOMES**

<b>305.1</b>	Select the type of remote sensing technique / data for required purpose.
<b>C305.2</b>	Identify the earth surface features from satellite images.
<b>C305.3</b>	Analyze the energy interactions in the atmosphere and earth surface features.
<b>C305.4</b>	Prepare thematic maps.
<b>C305.5</b>	Interpretations of satellite data for various applications.

#### A15420. BASIC ELECTRONICS AND INSTRUMENTATION

(Open Elective-I)

##### COURSE

##### OUTCOMES

<b>C305.1</b>	Summarize the concepts of different semiconductor devices with its characteristics.
<b>C305.2</b>	Describe the fundamental concepts and basic principle of meters.
<b>C305.3</b>	To classify the types of transducer with its methodology of data collection.
<b>C305.4</b>	Categorize different transducers and their working principles
<b>C305.5</b>	Explain different bridges and understand how different physical parameters can be acquired.

#### A15487. ANALOG COMMUNICATION LAB

##### COURSE OUTCOMES

<b>C306.1</b>	To implement and verify the different techniques in Amplitude modulation.
<b>C306.2</b>	To Analyze and interpret the results in frequency domain using the spectrum Analyzer
<b>C306.3</b>	To recite and relate the frequency modulation and demodulation
<b>C306.4</b>	To implement and summarize the different Pulse modulation and demodulation methods
<b>C306.5</b>	To calculate the frequency response of Pre-Emphasis and De-Emphasis

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A15488. LDIC Application Lab** **COURSE OUTCOMES**

<b>C307.1</b>	To implement and verify the application of IC 741
<b>C307.2</b>	To analyze and interpret the application of IC 555
<b>C307.3</b>	To Implement and verify the Small scale integrated circuits
<b>C307.4</b>	To Understand and evaluate the counter IC's and shift registers.
<b>C307.5</b>	To verify Various logic gates and flip flops.

#### **A158089. ADVANCED COMMUNICATION SKILLS LAB** **COURSE OUTCOMES**

<b>C308.1</b>	The student will be able to build communication competence in person-to-person interactions to build self-efficacy and to manage relationships and improve communicative behaviour of dyadic interactions in various contexts.
<b>C308.2</b>	The student will be able to annotate effectively for active reading, increased comprehension & retention while synthesizing information both print and online sources for their relevance, accuracy and appropriateness.
<b>C308.3</b>	The student will be able to develop unique qualities of professional rhetoric and writing style and explore different format features in both print, multimedia documents, and develop document design skills.
<b>C308.4</b>	The student will be able to identify essential components of Presentation and will be able to speak with greater control and charisma in front of a larger audience.
<b>C308.5</b>	The students will be able to know the significance of group activities and acquire oral skills & body language used for effective Group discussion and prepared to face interviews.

## III B.TECH- II SEM

### A16018. MANAGERIAL ECONOMICS AND FINANCIAL ANALYSIS

#### COURSE OUTCOMES

<b>C309.1</b>	to understand and enhance the knowledge regarding managerial economics concepts and obtaining optimal solutions.
<b>C309.2</b>	to get an idea of analysis of firm's financial position with the techniques of financial analysis
<b>C309.3</b>	to get an idea of analysis of firm's financial position with the techniques of ratio analysis.
<b>C309.4</b>	To understand analysis of markets, forms of business organizations,
<b>C309.5</b>	To know the significance of capital budgeting

### A16422. VLSI DESIGN

#### COURSE OUTCOMES

<b>C310.1</b>	Explain the fabrication process involved in Integrated Circuit Technology and label the effects of current and voltage in MOS transistors.
<b>C310.2</b>	Understand the primary and secondary effects of MOSFET and BICMOS
<b>C310.3</b>	Summarize the divergent techniques involved in design of VLSI circuits using Design Rules.
<b>C310.4</b>	List various Static and dynamic CMOS gate circuits involved in System design.
<b>C310.5</b>	Illustrate the process involved in programmable logic design and testing methods.

#### **MATERIAL SCIENCE ENGINEERING (MSE)**

##### **COURSE OUTCOMES**

<b>C316.1</b>	Understanding the crystal structures and necessity of alloys.
<b>C316.2</b>	Classifying the ferrous materials and their heat treatment process.
<b>C316.3</b>	Evaluating the non ferrous materials and their applications in Engineering usage.
<b>C316.4</b>	Applying the composite materials as an efficient substitute.
<b>C316.5</b>	Implementing the principles of nano science and their by producing materials.

#### **DATA BASE MANAGEMENT SYSTEMS**

##### **COURSE OUTCOMES**

<b>C316.1</b>	Understand the Database Management systems concepts
<b>C316.2</b>	Analyze Entity-Relationship Model for enterprise level databases
<b>C316.3</b>	Develop a database and formulate the complex SQL queries
<b>C316.4</b>	Evaluate various Relational Formal Query Languages
<b>C316.5</b>	Analyze various Normal forms to carry out Schema refinement

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

#### Software Engineering(Open Elective)

##### COURSE OUTCOMES

<b>C316.1</b>	Understand various process models
<b>C316.2</b>	Apply requirement engineering process for a project.
<b>C316.3</b>	Analyze the design engineering and architectural design
<b>C316.4</b>	Evaluate various testing techniques
<b>C316.5</b>	Evaluate various metrics for process and products

#### FINANCIAL INSTITUTIONS AND MARKETS (FIM)

##### COURSE OUTCOMES

<b>C316.1</b>	Understand object oriented software development process
<b>C316.2</b>	Gain exposure to object oriented methodologies & UML diagrams
<b>C316.3</b>	Use object oriented behavioral modeling analysis for project
<b>C316.4</b>	Apply object oriented Architectural modeling analysis for project
<b>C316.5</b>	Construct for developing structural design of a given project by using

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A16428. FUNDAMENTALS OF EMBEDDED SYSTEMS**

**(Open Elective-II)**

##### **COURSE OUTCOMES**

<b>C316.1</b>	Contrast the basics of embedded system with its application
<b>C316.2</b>	Illustrate the components required for embedded system design.
<b>C316.3</b>	Summarize the different development tool for embedded system
<b>C316.4</b>	Relate the concepts of RTOS in real time programming
<b>C316.5</b>	Outline the features of advanced buses for distributed data transfer in system design.

#### **A16429. PRINCIPLES OF COMMUNICATIONS**

**(Open Elective-II)**

##### **COURSE OUTCOMES**

<b>C316.1</b>	Understanding the fundamentals of communications
<b>C316.2</b>	Summarize the different modulation techniques involved in analog and digital Communication.
<b>C316.3</b>	Identify the applications of various wired and wireless communications in real time.
<b>C316.4</b>	Elaborate the fundamentals of satellite and optical communications.
<b>C316.5</b>	Understand various Networking Concepts.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A16489. MICROPROCESSOR AND MICROCONTROLLER LAB** **COURSE OUTCOMES**

<b>C317.1</b>	To Understand and implement the basic programs of microprocessor (8086)
<b>C317.2</b>	To analyze and interpret the interfacing concept of microprocessor (8086) with other Processors
<b>C317.3</b>	To illustrate and show the different programs using Microcontroller (8051)
<b>C317.4</b>	To implement and verify the interfacing concepts with 8051 microcontroller
<b>C317.5</b>	Analyze Timers with 8051 microcontroller

#### **A16490. DSP AND eCAD LAB** **COURSE OUTCOMES**

<b>C318.1</b>	To generate and verify the basic concepts of signal processing
<b>C318.2</b>	To design and summarize the result of different types of filters
<b>C318.3</b>	To understand DFT and FFT Algorithms
<b>C318.4</b>	To Implement and verify the combinational circuits using HDL
<b>C318.5</b>	To Understand and evaluate the sequential circuits using HDL

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

## IV B.TECH- I SEM

### A17430. DIGITAL COMMUNICATIONS

#### COURSE OUTCOMES

<b>C401.1</b>	Understand different digital modulation techniques such as PCM, DM and various shift keying techniques.
<b>C401.2</b>	Calculate different parameters like power spectrum density, probability of error etc of Base Band signal for optimum transmission.
<b>C401.3</b>	Generate and retrieve data using block codes and convolution codes
<b>C401.4</b>	Analyze the error detection and correction capabilities of linear, cyclic and convolution codes.
<b>C401.5</b>	Analyze Performance of spread spectrum communication system

### A17431. EMBEDDED SYSTEM DESIGN

#### COURSE OUTCOMES

<b>C402.1</b>	Know the fundamentals, hardware and software details of the embedded systems
<b>C402.2</b>	Interface serial, parallel and network communication protocols to embedded systems
<b>C402.3</b>	Know the embedded system design life cycle and co-design issues.
<b>C402.4</b>	Analyze and Develop the various embedded system applications.
<b>C402.5</b>	To design real time operating systems

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

#### **A17432. ANTENNAS AND MICROWAVE PROPAGATION**

##### **COURSE OUTCOMES**

<b>C403.1</b>	Aware of parameter considerations viz. antenna efficiency, beam efficiency, radiation resistance etc. in the design of an antenna.
<b>C403.2</b>	Understand the design issues, operation of fundamental antennas like Yagi-Uda, Horn antennas and helical structure and also their operation methodology in practice.
<b>C403.3</b>	Understand the different types of Wave propagation
<b>C403.4</b>	Understand the significance of microwaves and Analyze the characteristics of microwave tubes and compare them.
<b>C403.5</b>	Be able to list and explain the various microwave solid state devices and Can set up a microwave bench for measuring microwave parameters.

#### **A17433. DIGITAL IMAGE PROCESSING**

(Professional Elective - 3)

##### **COURSE OUTCOMES**

<b>C404.1</b>	Discuss digital image fundamentals
<b>C404.2</b>	utilize the Image processing concept to various fields of engineering and real time applications
<b>C404.3</b>	Apply image enhancement and restoration techniques and use image compression and segmentation Techniques.
<b>C404.4</b>	Represent features of images and implement basic image processing concepts using MATLAB.
<b>C404.5</b>	Experiment, analyze & interpret image data

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)  
Aziz Nagar Gate, C.B. Post, Hyderabad-500 075

#### **A17437. TELECOMMUNICATION SWITCHING SYSTEMS AND NETWORKS**

**(Professional Elective - 3)**

##### **COURSE OUTCOMES**

<b>C405.1</b>	Understand the main concepts of telecommunication network design.
<b>C405.2</b>	Analyze and evaluate fundamental telecommunication traffic models.
<b>C405.3</b>	Understand basic modern signaling system.
<b>C405.4</b>	Solve traditional interconnection switching system design problems.
<b>C405.5</b>	Understand the concept of packet switching

#### **A17435. MULTIMEDIA AND SIGNAL CODING**

**(Professional Elective - 3)**

##### **COURSE OUTCOMES**

<b>C406.1</b>	Comprehend the fundamentals behind multimedia signal processing.
<b>C406.2</b>	Realize the fundamentals behind multimedia compression.
<b>C406.3</b>	Know the basic principles behind existing multimedia compression and communication standards.
<b>C406.4</b>	Understand future multimedia technologies
<b>C406.5</b>	apply the acquired knowledge to specific multimedia related problems and projects at work.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A17436. DSP PROCESSORS AND ARCHITECTURES**

**(Professional Elective - 4)**

##### **COURSE OUTCOMES**

<b>C407.1</b>	To Illustrate the signals and systems in frequency domain.
<b>C407.2</b>	To Evaluate the signals by using Discrete Fourier Series and to compute the Discrete Fourier Transform for different types of signal, To apply the DFT to the signals and systems for analyzing the systems and to represent the discrete time systems by using linear constant coefficient difference equations
<b>C407.3</b>	To Analyze Fast Fourier Transform of the discrete signal for analyzing them and to compare the DFT with FFT with respect to their complexity and time consumption. To explain the multi rate signal processing and to know different blocks like Decimation and Interpolation involved in the multi rate signal processing. To convert the sampling rates and implement the sampling rate conversion
<b>C407.4</b>	Understand the architecture for programmable DSP devices and programmable Digital signal processor
<b>C407.5</b>	Design DSP and FFT algorithms and interfacing of memory and I/O peripherals to programmable DSP devices.

#### **A17438. LOW POWER VLSI DESIGN**

**(Professional Elective - 4)**

##### **COURSE OUTCOMES**

<b>C408.1</b>	Understand the need for low power VLSI design.
<b>C408.2</b>	Clearly find the various sources of power dissipation in a given VLSI circuits.
<b>C408.3</b>	Describe the relationship of probability while finding power dissipation of VLSI circuits.
<b>C408.4</b>	Design low power arithmetic circuits and systems.
<b>C408.5</b>	Design a low power memory sub systems.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A17439. PROGRAMMING IN MATLAB**

(Professional Elective - 3)

##### **COURSE OUTCOMES**

<b>C409.1</b>	Break down computational problems into a series of simple steps.
<b>C409.2</b>	Create programs in the MATLAB language for engineering applications..
<b>C409.3</b>	Appraise and get familiarized with the visualization techniques.
<b>C409.4</b>	Familiarized with Different application tools required for different area of domain
<b>C409.5</b>	Expose to the common algorithms and techniques that are the building blocks of MATLAB.

#### **A17491. EMBEDDED SYSTEM DESIGN LAB**

##### **COURSE OUTCOMES**

<b>C410.1</b>	Write programs using ARM cortex M0+ processor instruction set.
<b>C410.2</b>	Dump programs into FRDM kit.
<b>C410.3</b>	Communicate among different processors with FRDM kit
<b>C410.4</b>	Interface I/O devices with FRDM kit.
<b>C410.5</b>	Interface LED devices with FRDM kit.

(Accredited by NAAC, Approved by AICTE New Delhi & Permanently Affiliated to JNTUH)

#### **A17492. MICROWAVE ENGINEERING AND DIGITAL COMMUNICATIONS LAB** **COURSE OUTCOMES**

<b>C411.1</b>	Explain and verify the characteristics of microwave devices
<b>C411.2</b>	Analyze radiation pattern of antenna.
<b>C411.3</b>	Identify and illustrate the scattering parameters of different microwave devices
<b>C411.4</b>	Demonstrate their knowledge in base band signaling schemes through implementation of FSK, PSK and DPSK
<b>C411.5</b>	Understand Multiplexing of two Band limited Signals through TDM.

#### **ELEMENTS OF CIVIL ENGINEERING (ECE)** **COURSE OUTCOMES**

<b>C412.1</b>	Understand Geological properties and Geotechnical aspect of civil engineering.
<b>C412.2</b>	Plan the concept of different building byelaws and planning principles.
<b>C412.3</b>	Analyse the concept of stress-strain and to identify the properties of the fluid changes treatment process.
<b>C412.4</b>	Apply modern tools of surveying and understand basic concepts of concrete.
<b>C412.5</b>	Evaluate the principles of highway geometric designs and types of pavements as per IRC standards.

#### INTRODUCTION TO EARTHQUAKE ENGINEERING(IEE)

##### COURSE OUTCOMES

<b>C412.1</b>	Understand the Interior Earth' surface, fault attenuation, different wave propagation in Earthquake events.
<b>C412.2</b>	Classify different earthquake hazards and its effects.
<b>C412.3</b>	Examine the mechanical behavior of earth surface and its significance.
<b>C412.4</b>	Evaluate the quantification of Hazard effects - approach methods.
<b>C412.5</b>	Predict the vibration motion and how it influences the earth's surface.

#### OPTIMIZATION TECHNIQUES (OT)

##### COURSE OUTCOMES

<b>C412.1</b>	Understanding the concepts of optimization techniques.
<b>C412.2</b>	Compute the minimum transportation cost by different methods.
<b>C412.3</b>	Analyzing the waiting lines in terms of Queuing theory parameters.
<b>C412.4</b>	Applying the costing principles in identifying the minimum inventory.
<b>C412.5</b>	Evaluating the simulation process for various OR models.

#### MAINTENANCE AND SAFETY ENGINEERING (MSE)

##### COURSE OUTCOMES

<b>C412.1</b>	Understanding the need for maintenance of a machine in an industry.
<b>C412.2</b>	Identifying various maintenance policies.
<b>C412.3</b>	Analyzing the cost and time concepts while implementing the maintenance.
<b>C412.4</b>	Evaluating the quality concepts for safety and maintenance of an equipment
<b>C412.5</b>	Appreciating the terms reliability and maintainability with reference the maintenance of an equipment.

#### Information Systems for Engineers(ISE)(Open Elective)

##### COURSE OUTCOMES

<b>C412.1</b>	Understand the concepts of Information Systems.
<b>C412.2</b>	Evaluate the design, development and security of Information Systems
<b>C412.3</b>	Analyze the various modules in social issues while using Information Systems.
<b>C412.4</b>	Analyze the issues in data security
<b>C412.5</b>	Analyse the concept of ethics in information systems.

##### A18441. CELLULAR AND MOBILE COMMUNICATIONS

##### COURSE OUTCOMES

<b>C413.1</b>	To explain the concept of cell coverage for signal, traffic, and diversity techniques to design an antenna.
<b>C413.2</b>	To use frequency management, Channel assignment for the design of a cellular system.
<b>C413.3</b>	To analyze and design wireless and mobile cellular systems.
<b>C413.4</b>	To classify frequency management, Channel assignment and types of handoff and apply in the design of a cellular system.
<b>C413.5</b>	To understand the cell and base stations

##### A18442. DATA COMMUNICATIONS AND NETWORKING

##### COURSE OUTCOMES

<b>C414.1</b>	To understand and explore the basics of Computer Networks and Various Protocols.
<b>C414.2</b>	To explain the World Wide Web concepts.
<b>C414.3</b>	To administrate a network and flow of information.
<b>C414.4</b>	To understand easily the concepts of network security, Mobile and ad hoc networks.
