

Industrial Engineering and Operations Management (IEOM)

The IEOM Society International envisions being the premier global organization dedicated to advancing industrial engineering (IE) and operations management (OM) for the betterment of humanity. Its mission focuses on fostering critical thinking and promoting its effective utilization by creating platforms for communication and networking among diverse individuals, particularly in emerging economies. The organization values globalization, diversity, and inclusion, encouraging innovative and entrepreneurial thinking while empowering students and fostering mentorship. It emphasizes professional development and lifelong learning, building strong partnerships among industry, academia, and government to drive impactful projects. Moreover, it champions sustainability and community development, integrating IE and OM practices with global environmental and societal goals. Together, these principles reflect IEOM's commitment to addressing both technical and humanitarian challenges, ensuring progress across industries and communities worldwide.

S.No	Date	Topic	Resource person	Affiliation
1	11-Aug-2023	Metal cutting aspects of HSLA metals	Dr. P.V. Gopala Krishna, Associate Professor	VCE, Hyderabad
2	3-Oct-2022	Introduction to Mechatronics in manufacturing and Recent advancements	Dr. G. Haragopal, Professor	CBIT, Hyderabad
