## VIDYA JYOTHI INSTITUTE OF TECHNOLOGY

Vidya Jyothi Institute of Technology (VJIT) was established in 1998 by the Vidya Jyothi Educational Society, founded by a group of dedicated academicians and enterprising educationists. The Institute operates under the guidance of a resourceful management team, supported by committed faculty and staff, all focused on addressing the future needs of its quality-driven student community.

Institute is accredited with an NAAC A+ grade and all five major B.Tech programs -CSE, ECE, EEE, Mech, and IT - are accredited by NBA under TIER-1. The Civil Engineering program received an extension for three years in 2024-25 to 2026-27. VJIT received an extension of autonomy for five years in 2021 and has established JNTUH-recognized research centers in the departments of CSE, ECE, and EEE.

VJIT's academic and research environment is strengthened by a dedicated faculty of 322 members, of which 83 hold Ph.D. degrees and 115 are currently pursuing doctoral research at reputed institutions.

### Rankings and Achievements (2024)

Vidya Jyothi Institute of Technology (VJIT) stands out as a premier institute, recognized nationally and regionally for its academic excellence and commitment to innovation in engineering education. Below is a summary of the institute's notable rankings and recognitions for the year 2023:

### *National and Regional Rankings*

**NIRF 2024:** Placed in the 201-300 rank band in the Engineering category

#### **1. Times Annual Engineering College Ranking Survey 2024**

6<sup>th</sup> Best Engineering College in Telangana.  
5<sup>th</sup> Best College for Placements in Telangana.

#### **2. Outlook Survey Ranking 2023:** 84<sup>th</sup> Rank among engineering institutes in India.

#### **3. CMR Dataquest Survey 2023**

9<sup>th</sup> Rank in South Zone  
12<sup>th</sup> Rank among Private Sector Colleges  
15<sup>th</sup> Rank Overall in India

#### **4. The Week 2023:**

145<sup>th</sup> All Over India.

14<sup>th</sup> in Telangana (Private Colleges)  
13<sup>th</sup> in Hyderabad (Private Colleges)

#### **5. Green Ranking 2023:** Rated A Category (Gold )

6. Silicon India 2023: Ranked 27<sup>th</sup> in India and 8<sup>th</sup> in South India

7. India Today **2023:** Ranked 132<sup>nd</sup> rank among all private engineering colleges in India.

## Progress Report 2024-25

As a technical educational institution, VJIT fosters innovation, research, and entrepreneurship in the fields of Science and Technology. Its mission is to unlock the potential of students, empowering them to gain meaningful life experiences and successfully establish their careers. VJIT is a preferred choice among students due to its diverse development activities and inspiring environment.

At VJIT, the future of students remains the central focus—dedicated to shaping a unique and dynamic technical tomorrow, today...

The institute offers 8 B.Tech programs, 5 M.Tech specializations, and an MBA program, with a strong 97% first-year enrollment rate in 2024–25.

Major achievement of Institute is “TEDx VJIT” is organized by VJIT in the month of October 25<sup>th</sup> 2024.

Raghavendra Gavuji, a 4th-year student from the Artificial Intelligence department, for securing a place among the Top 25 Super Coders in TCS CodeVita Season 12. Out of 537,900 participants worldwide, Raghavendra not only reached the prestigious finale held at TCS Siruseri Campus, Chennai, but also made history at VJIT as the first student to achieve this recognition in a global industry-level coding competition.

In terms of placements, VJIT has maintained impressive outcomes for the 2024-25 graduating batches. Over 76 software and core companies visited the campus, resulting in 245 students being placed and 304 offers made. Reputed companies like Factset, Lloyds Technology, HCL Tech, Cognizant and Mahindra & Mahindra conducted recruitment drives as part of campus placement.

VJIT continues to blend academic rigor with innovation, entrepreneurship, cultural growth, and sporting spirit - ensuring holistic development for all its students.

## Progress Report 2024-25

### VISION

- To develop into a reputed Institution at National and International level in Engineering, Technology and Management by generation and dissemination of knowledge through intellectual, cultural and ethical efforts with human values.
- To foster scientific temper in promoting the world class professional and technical expertise.

### MISSION

- To create state-of-the-art infrastructure facilities for optimization of knowledge acquisition.
- To nurture the students holistically and make them competent to excel in the global scenario.
- To promote R&D and consultancy through strong industry-institute interaction to address the societal problems.

## Progress Report 2024-25

---

### Short Term Goals

- To start industry driven P.G. Programmes in various disciplines.
- To have MoUs with reputed universities, R & D institutions and industries to nucleate research centre.
- To provide consultancy & testing facilities.

### Long Term Goals

- To become a top-ranking Institution in the country.
- To have MoUs with reputed universities and R & D institution at international levels.
- To develop the institution into a deemed university.

### Quality Policy

- To ensure high standards to educate, enrich and excel in imparting professional education, by top-quality-faculty who endeavors to mould the students into socially responsible professionals through creative team-work, innovation and research.

### Best Practices

#### Best Practice 1

##### 1. Title of the Practice: *Strengthening of Industry- Institute Collaboration*

##### 2. Objectives of the Practice

- To enhance the relationship between the Institute and industry.
- To promote participation of industry personnel in the development of curricula & high-quality student projects.
- To establish Memoranda of Understanding between the Institute and industries to foster strategic Collaboration.
- To organize visits of industry executives and practicing engineers to the Institute for discussions and guest lectures on industrial practices, trends and experiences.
- To facilitate visits of faculty members to industries for study, discussions and lectures on subjects of mutual interest.
- To enable industrial training, internship programs and study tour for students.
- To encourage entrepreneurial activities among the students
- To support consultancy/ training services using the institutional expertise

##### 3. The Context

## **Progress Report 2024-25**

---

Interaction between educational institutions and industries is the need of the hour to ensure effective exposure for technical students and to enhance the employability across the diverse sectors. The Industry-Institute Interaction Cell (IIIC) of the institute is dedicated to promoting close interaction between industries and various departments. Industries today are aware of the recent developments and inventions in their respective domains and they consistently implement technologically advanced projects to strengthen the economy. The IIIC acts as a vital bridge connecting the industry, the real world, and the Institute. Industrial exposure for faculty members contributes significantly to guiding students in current industrial practices and technologies.

At VJIT, the IIIC strives to prepare engineering students for employment in multinational and leading domestic companies by equipping them with updated technologies and engineering methodologies, thereby bridging the gap between academia and industry. In a rapidly changing market driven by competition and high-quality expectations, a dynamic, responsive, and human-centered education system is essential to meet industrial challenges.

To address these challenges, VJIT has established the Industry–Institute Interaction Cell under the leadership of an expert team with extensive academic and industrial experience. The ultimate aim of this initiative is to impart professional education aligned with contemporary industry practices, enabling students to become industry-ready and capable of securing sustainable employment in their respective fields. The IIIC at VJIT is committed to achieving these objectives through strategic collaboration and continuous engagement with the industrial sector.

#### **4. The Practice**

**The institute endeavors in sustaining adherence with the industries and in establishing strong linkages with various industries across the departments such as:**

### 6. Problems Encountered

The cost of certain high-value certifications offered through the Centers of Excellence (CoEs) is quite high, making it challenging to support all students in obtaining these certifications. There is also a need for more skilled and certified faculty members to ensure the smooth functioning of the CoEs.

To address this, the Industry–Institute Interaction Cell (IIIC) of VJIT has taken the initiative to upgrade the skill sets of faculty members. As a result, a significant number of VJIT faculty members are now certified trainers, contributing effectively to the institutional objectives.

### 7. Resources required to implement the Practice

- Well-equipped computer laboratories with the necessary software and hardware infrastructure are available.
- The library houses a substantial collection of books and journals covering engineering, science, and management disciplines.
- VJIT has a pool of highly qualified and well-trained faculty members.

### 8. Fruitful Endeavors through Industry Collaboration

- Students benefit from placement opportunities, internships, and major project guidance after completing relevant training and certification programs.
- Training provided is aligned with industry needs, ensuring students are exposed to the latest technological advancements and industrial practices.
- Through the efforts of the IIIC, faculty members gain exposure to emerging technologies, which are subsequently integrated into the curriculum to enhance its relevance and effectiveness.

### 1. Title of the practice: PRAYUKTHI- Employability, Entrepreneurship & Higher Education

PRAYUKTHI is an innovative initiative at VJIT aimed at empowering students from reserved categories (SC/ST) and enabling them to excel among their peers. The initiative seeks to build confidence in these students by addressing their current needs while enhancing their future prospects. At VJIT, PRAYUKTHI is recognized as a distinguished and commendable initiative, identified as **Best Practice 2**, focusing on promoting academic growth and personal development among students from reserved categories.

### 2. Objectives of the Practice

- To motivate SC/ST students to pursue higher education and prepare for government and other professional careers.
- To train SC/ST students in soft skills, communication skills, and interpersonal skills, thereby enabling them to face interviews confidently and secure better placements.
- To effectively utilize intellectual resources by reducing the time spent searching for opportunities and promoting immersive self-learning experiences.
- To provide study materials for all major competitive examinations.
- To facilitate access to essential academic resources and encourage meaningful faculty–student interactions beyond regular class hours.
- To transform passive learners into active learners capable of independently reproducing, applying, and expanding knowledge.
- To extend financial assistance to deserving students with the support of College Management and organize seminars and guest lectures by experienced faculty and industry professionals.
- To engage students from the first year to the final year in initiatives that foster awareness of career development, industrial employment, and entrepreneurship.
- To make them confident in taking assessments and certifications related to skills required.

### 3. The Context

Most of our students come from diverse socio-economic backgrounds. Many of them may not be familiar with the fundamental concepts of various subjects, as their significance was not emphasized at the intermediate level. Additionally, they lack awareness of the essential skills required for employability, such as communication skills. Therefore, at VJIT, we have introduced this scheme to motivate students and enhance their overall skill development.

### Cisco Career Certifications

Cisco certifications are a series of professional credentials offered by Cisco Systems, a leading provider of networking and telecommunications solutions. These certifications validate an individual's knowledge and skills in Cisco technologies and help them advance their careers in the IT industry. Cisco also provides training courses and learning resources to assist individuals in preparing for these exams. Once certified, professionals can showcase their expertise to potential employers and clients, enhancing their career opportunities.

### CODETANTRA Certifications

CodeTantra emphasizes an interactive "learn by doing" methodology that incorporates real-world scenarios. The certification signifies the completion of hands-on practical training rather than passive, video-based learning. While CodeTantra certifications demonstrate foundational programming knowledge, their overall significance largely depends on the context—particularly when compared to industry-recognized credentials. Their value is most prominent within academic institutions that have partnered with CodeTantra.

### EDUSKILLS Certifications

EDUSKILLS certifications are valuable for both students and professionals as they validate in-demand technical skills and create pathways to employment in the Industry 4.0 era. These certificates benefit learners as well as educational institutions by bridging the gap between academic knowledge and industry requirements. Students who complete the programs receive certificates directly from corporate partners and gain access to hiring opportunities, helping them effectively launch their careers.

### AWS Certifications

Earning a certification enhances your resume, helping you stand out to hiring managers and pass initial screening filters. It can open doors to better job opportunities, promotions, and specialization in high-demand fields such as machine learning, cybersecurity, and data analytics. Moreover, the process of preparing for and passing an AWS exam develops in-depth knowledge of the platform and best practices, leading to greater confidence when handling complex projects.

### GREAT LEARNING Certifications

*Great Learning certifications can significantly enhance a professional's career, especially for upskilling in high-demand fields such as data science and artificial intelligence. The value of these certifications largely depends on the specific program, its university affiliation, and the learner's individual career objectives. The most sought-after certifications from Great Learning are those developed in collaboration with prestigious universities like MIT, Stanford, the University of Texas at Austin, and the IITs. These programs reflect the academic rigor and accreditation of their partner institutions, making the certifications globally recognized and highly respected by employers.*

*Scaler certifications hold significant value for tech professionals seeking to advance their careers, particularly those aspiring to join top product-based companies. The true importance of a Scaler certificate lies not merely in the credential itself, but in the comprehensive learning ecosystem it represents—emphasizing practical, real-world skills and extensive career support. These certificates are recognized across the tech industry as evidence of completing a rigorous, hands-on training program.*

### Campus Recruitment training (CRT)

The Training and **Placement Cell (TPC)** at Vidya Jyothi Institute of Technology (VJIT) is committed to achieving maximum placement success through a structured, progressive, and industry-aligned approach.

From the **1st and 2nd years**, students undergo common placement-focused training designed to build a strong foundation in essential skill areas such as:

- Quantitative Aptitude
- Logical Reasoning
- Verbal Ability
- Python Programming
- Data Structures using C

## Progress Report 2024-25

---

In the **3rd year**, students aspiring to join **product-based companies** can opt for specialized Product-Based Training after a selection process. This intensive program includes **200 hours** of advanced training tailored to meet the expectations of top-tier product companies.

Throughout the four-year program, each placement-aspiring student undergoes a total of **500 hours** of industry-readiness training, distributed as follows:

- 120 hours of Verbal Training
- 120 hours of Quantitative and Problem-Solving Training
- 200 hours of Core Training aligned with branch-specific requirements (e.g., **coding** for circuit branches)

To optimize placement outcomes, **Company-Specific Training** is also provided to help students meet the unique competency expectations of their target organizations.

This comprehensive and focused training model ensures that VJIT students are fully prepared to excel in their **careers** and meet evolving industry standards with confidence and competence.

### Training & Assessment Partners

VJIT has established partnerships with several leading training providers to support students in developing workforce-ready skills and technical proficiency. These partnerships include:

- **Smart Interview:** Offers high-quality technical education through a curriculum designed by industry experts.
- **CCC (Comprehensive Academic Training):** Focuses on holistic academic enhancement, skill development, and continuous assessments.
- **Talentio:** Delivers specialized training and assessment solutions to enhance employability skills.
- **CODE TANTRA:** An interactive software platform enabling students to learn and master IT technologies using adaptive and immersive techniques.
- **Instacks:** An advanced AI-driven platform for assessments and LMS, supporting personalized learning and industry readiness.

Additionally, VJIT collaborates with global and national leaders such as Infosys Springboard, Oracle Academy, AWS Educate, Eduskills, and EPAM Systems to provide industry-recognized certification, supplementary skill development, and practical exposure for students. These multi-dimensional training partnerships ensure that students receive optimal support to achieve success in the workforce.

### 1.6 Curriculum

#### 1.6.1 Curriculum Development Process

#### Curriculum Design and Pedagogical Approach at VJIT

## Progress Report 2024-25

---

At VJIT, we embrace *design learning* as a core pedagogical approach, combining the effectiveness of participatory classroom engagement with technology-driven active learning strategies. Our pursuit of excellence in technical education is rooted in continual improvement, aiming to nurture responsible technocrats who contribute meaningfully to nation-building. We are dedicated to fostering a positive and professional learning environment that inspires students to strive for excellence. Our goal is to shape competent engineers, innovative technologists, and visionary leaders for a global society. This is made possible through a cohesive network involving parents, alumni, students, faculty, and industry partners.

### Curriculum Philosophy and Structure

The curriculum at VJIT is meticulously designed to ensure that by the time of graduation, students develop proficiency in multiple domains—technical knowledge, practical application, problem-solving for societal challenges, use of modern tools and software, and the translation of knowledge to address industry and societal needs. We follow the **Outcome-Based Education (OBE)** model for curriculum design and implementation, grounded in clearly defined objectives and measurable course outcomes. The OBE framework encompasses planning, execution, continuous quality improvement, assessment, and evaluation across all programs.

To design and implement a dynamic, future-ready curriculum, the institution adopts a structured and systematic process. Global challenges are met with forward-thinking initiatives that are thoroughly discussed in the **Board of Studies (BoS)**, approved by the **College Academic Council (CAC)**, and finalized by the **Board of Governors (BoG)**.

### Key Features of the Autonomous Curriculum

- **Choice Based Credit System (CBCS)** implemented
- **Fast-track curriculum implementation** for timely course delivery
- **Mandatory courses** introduced in the 2nd year
- **Open electives** introduced from the 3rd year
- **Quantitative Methods and Logical Reasoning (QMLR)** introduced in the 3rd year
- **Professional Communication** training in the 2nd year
- **Personality Development and Behavioral Skills** included in the 3rd year
- **Question papers** designed according to Bloom's Taxonomy
- **Semester End Examinations** set and evaluated by experienced external examiners

### Focus on Employability and Innovation

The curriculum is designed to ensure graduates are not only employable but also capable of innovation and research. To enhance employability, new industry-aligned courses have been introduced, focusing on analytical and problem-solving skills, social awareness, and core subject

## Progress Report 2024-25

expertise. A broad spectrum of **core, interdisciplinary, open, and generic electives** prepares students for real-world challenges.

To promote innovative thinking, the curriculum integrates **interdisciplinary electives** that encourage a multi-disciplinary approach to problem-solving. To support execution of these ideas, the institute has established **exclusive labs** and various **Centers of Excellence**.

### **Research and Societal Relevance**

Research orientation is a key objective. Through a wide array of elective courses and professional subjects, students are encouraged to develop and implement research ideas. Specialized courses provide the foundation for building strong research competencies.

VJIT's curriculum is designed with a strong societal focus. Inputs are gathered regularly from a diverse group of stakeholders, including students, alumni, employers, academic experts, industry professionals, and parents—via both formal and informal feedback mechanisms. This feedback is carefully analyzed and serves as the basis for curriculum refinement and redesign during BoS meetings.

### **Commitment to Continuous Improvement**

The curriculum is continuously upgraded based on stakeholder input to ensure it aligns with societal needs and industry expectations. Our mission is to develop competent engineers and managers who emerge as global leaders, grounded in values and equipped to drive innovation and change.

### **The Curriculum framing process**

The Curriculum framing process for the identification of curriculum gaps involves a phase wise process which is done in each Academic Year.

#### ***Phase 1. Faculty knowledge domain***

The faculty handling the existing course individually provides general information on the quality of the course; strategic directions for the course; satisfaction of the course meeting with the curriculum. He/she analyses the present curriculum and updates the current industry/societal requirements. A draft curriculum gap report is prepared.

#### ***Phase 2. Assessment of delivery of the program and quality of the program through in program students and exiting students***

An in-program student survey is conducted to measure the degree to which current students believe they are achieving program-level learning outcomes; overall satisfaction with program; overall satisfaction with program delivery. An exit student survey is conducted for the exiting students to measure quality of the program and satisfaction with curriculum and overall program delivery. These surveys are conducted to assess the delivery of the program and quality of the program. The gaps in the teaching-learning process are identified in this phase.

## Progress Report 2024-25

### ***Phase 3. Curriculum mapping with POs and PSOs***

The course mapping with POs and PSOs is made by Course Coordinators which clearly identifies the curriculum gaps. These mappings will identify the deficiencies in attainment of PO's and PSO's

### ***Phase 4. Program Assessment Committee (PAC) meeting to consolidate the identified curriculum gaps in all the above phases***

A PAC meeting is to be conducted to consolidate the identified curriculum gaps in all the above phases. The suggestions will be recorded for the entire program and the deliberations are submitted to DAB for further approval

### ***Phase 5. Draft proposal finalization by Department Advisory Board (DAB)***

DAB meeting is to be organized to review and analyze the suggestions consolidated by Program Assessment Committee. DAB insists the department to organize curriculum development workshops in series of sessions with the academic experts. They finalize the draft proposal given by PAC for the development plan in due consideration with the suggestions from various stakeholders.

### ***Phase 6. Approval from Board of Studies***

Department wise Board of Studies will then finalize the draft proposal of Department Advisory Board and recommends the action plan for bridging the curriculum gaps and revises the syllabus. Finally, the syllabus is accorded and approved by Internal Quality Assurance Cell, Academic Council and ratified by Board of Governors.

### 1.6.2 Teaching Learning Process

The Teaching-Learning process at VJIT has gained significance with the inception of student-centric learning. VJIT has embraced the student-centric teaching methodology in the autonomous curriculum with emphasis on hands-on-learning, the ICT enabled learning along with the regular teaching processes has been adopted to engage students.

Power point presentations are used in the classrooms to provide audio visual experience to the students. The NPTEL video lectures are also adopted for enhanced learning while the “Think-Pair-Share” methodology is implemented for cooperative learning in the classrooms. Quizzes are conducted regularly, and assignments are given to the students to nurture their problem-solving abilities. Demonstration based learning and Case based learning emphasizes on the comparative result-oriented approach which helps students to think critically on the solution procedure to obtain the alternate solution and helps class room teaching more interesting. Collaborative learning is

## Progress Report 2024-25

---

encouraged by the support of platforms like Google classroom. The Project Based Learning is adopted for the self-study components from 3<sup>rd</sup> semester onwards. The project allocation, monitoring and evaluation system is in place and is running effectively under senior faculty guidance. A rubric for project evaluation which covers all the quality criteria is also well maintained. Effectively designed open-ended experiments are adopted to challenge the student's critical thinking, analysis and design capabilities. The students are also trained on modern simulation tools. The industry visits, site visits, guest lectures etc. are conducted regularly on the latest topics and trends in the industry. Hands-on workshops by the industry experts are organized regularly. Elective courses are offered based on the student's individual interest.

The final year Projects are evaluated by external experts using a well-defined detailed rubric framework to ensure quality of the projects and the best projects are awarded prizes. Value added courses are undertaken on various relevant topics. The students are also trained in abstract writing, technical paper writing and literature survey. OBE is practiced in true spirit resulting in more focused all-round development of our students.

**Modern Tool Usage:** All classrooms are equipped with LCD projectors facilitating faculty to take classes and students to present their project/research work in classroom.

YouTube based E-tutorials developed by faculty assist students in comprehending the concepts and enable students to replay in clearing doubts at specific bottleneck points.

Technology is used for enhancing the learning ability of the graduates. Tools like Google meet, Zoom are used for online classes.

VJIT encourages faculty members to utilize ICT tools available at their disposal so that teaching-learning experience becomes more interesting. To optimize the delivery of education, teachers at VJIT use the following ICT Tools:

1. 124 LCD Projectors are available in classrooms/labs.
2. Desktop and Laptops are there in all Computer Labs and Faculty cabins.
3. Printers are installed at Labs, HOD Cabins and all prominent places.
4. Photocopier machines are available in all buildings in VJIT campus.
5. Scanners are available at all prominent places.
6. Seminar hall equipped with all digital facilities is available for all departments.

8. Online Classes through Zoom, Google Meet, Microsoft Team
9. MOOC Platform (NPTEL, Coursera, SAP, Udemy, Edx etc)
10. Digital Library resources (DEL NET, etc)

**Industry-Institute-Interaction:** College has Industry-Institute Interaction Cell with coordinators at department level who work with representatives of various industries and train the students in their respective areas. The partnering industries provide internships, projects, and subsequently provide job offers to some of our students.

**Student Support System:** Participation of students in inter-college Hackathons and the prizes won by them is authentication of the support given from the Institute. The departments have also adopted many best practices with student centric methods. Remedial classes for the slow learners are conducted regularly. The Institution has several Student Clubs with an aim to inculcate the culture of innovation and encourage them to generate new ideas. The Institution ensures overall development of students through participatory learning experience.

VJIT takes responsibility in supporting student talent management, facilitating trainings in applied learning tasks focusing on short-term and long-term goals in areas of student development. The committed guidance never deteriorated even during tough Pandemic times by ensuring continuity in learning through:

- Faculty monitoring students to register for specific domain courses in Coursera. Preparing students to learn various courses including updated technologies under consideration.
- Students registered in courses of interest and eventually awarded with e-certificates.
- Cloud Technology is expended in using Google forms by faculty to conduct online assignments and examinations before and during pandemic period which helped in evaluation of the teaching learning process.
- Students presented progress of their project work by using ICT enabled tools and exhibiting their models to faculty.
- The flipped classroom teaching advanced ability to prepare lectures and presentation. The query answering trait got improved among students by employing ICT tools.

- The teaching methods facilitated in suppressing passive mode among slow learners and improved their proactiveness.

Academic Calendar is prepared before the commencement of academic year and is approved in the academic council. Two semesters each with 90 working days are formulated for UG and PG programmes. The calendar clearly illustrates the duration of Classwork, Mid and End Examinations. The calendar is disseminated to students and faculty through circulars, display in notice boards, posting in website etc.

Once the calendar is released the other connecting academic activities take initiation in each of the departments. The Head of the Department allocates the courses to faculty members who in turn prepare the course outcomes (CO) for assigned courses. The faculty further map the COs with POs and PSOs employing the numeric weightages/ratings.

The teaching plan also envisages the value-added courses to cater to the needs of students preparing them to match their skills to industry requirements without any further training.

The continuous evaluation is also planned in the semester at appropriate time periods such that the faculty can conduct assignments & mid examinations in the stipulated slots.

The teaching plan comprises Blooms Level Taxonomy associated questions with an objective to test the cognitive skill levels of our students. The teaching plan envisages the evaluation procedure for answer scripts, seminar reports, project reports and is carried by appropriate rubrics prepared initially at the commencement of the semester.

### **1.6.3 Human Values & Professional Ethics**

At VJIT, we believe that higher education must go hand-in-hand with character building and ethical development. Human Values and Professional Ethics are integrated into the academic framework and reinforced through a variety of student activities that nurture integrity, empathy, discipline, teamwork, and a sense of social responsibility.

This vision is reflected in the diverse range of activities our students actively participate in. These include paper presentations, project expos, hackathons, poster presentations, technical quizzes, and software application internships. Each of these events promotes critical thinking, innovation, and ethical collaboration. Activities such as sports fests and state-level athletic championships foster discipline, fairness, and teamwork—key professional values. Participation in national-level

symposiums and certifications related to technical and professional skills further enhance students' commitment to continuous learning and responsible innovation.

By engaging in these co-curricular and extracurricular activities, students internalize core human values and develop the professional ethics essential for real-world challenges. At VJIT, these efforts are aimed at producing not just skilled graduates but ethical professionals ready to contribute positively to society and the industries they serve.

### 1.6.4 Research & Innovation Ecosystem

Vidya Jyothi Institute of Technology (VJIT), Located on an eco-friendly campus, is committed to promoting sustainability through research and innovation. The institution actively encourages

## Progress Report 2024-25

---

faculty and students to undertake research projects aimed at solving real-world problems, particularly those that pose environmental hazards. This proactive approach reflects VJIT's dedication to academic excellence, societal relevance, and environmental responsibility.

### Research and Development (R&D) Cell

The **Research and Development (R&D) Cell** at VJIT plays a central role in fostering a strong research culture across disciplines. Specialized research laboratories have been established under its supervision to facilitate high-quality research by faculty and students. Notably, the Departments of **Computer Science and Engineering** and **Mechanical Engineering** have been recognized as official research centers by **Jawaharlal Nehru Technological University, Hyderabad (JNTUH)**.

To encourage research productivity, the institution offers **special incentives**, including financial awards and sanctioned research leave, to faculty members involved in quality research initiatives. VJIT researchers have published extensively in peer-reviewed **national and international journals**, including those indexed in **Scopus, SCI**, and recognized by **UGC**.

The institute has constituted a **Research Advisory Board**, comprising **eight eminent experts** from reputed universities and industries. This board is entrusted with guiding institutional research policies, offering strategic direction, and promoting the overall growth and development of research activities.

Further, the institution has signed **Memorandums of Understanding (MoUs)** with reputed industries to facilitate collaborative research and product development across various engineering domains. VJIT also provides **consultancy services** to industry partners, reflecting its practical engagement with the technological and industrial ecosystem.

### Entrepreneurship Development Cell (EDC) – Swashakthi

The **Entrepreneurship Development Cell (EDC)**, branded as "**Swashakthi**," was established in 2015 to instill entrepreneurial thinking among students. Since its inception, the EDC has consistently conducted **awareness programs, workshops, and innovation challenges** aimed at fostering startup culture and self-reliance among the student community.

## Progress Report 2024-25

---

The **VJIT Entrepreneurial Ecosystem**, initiated in the same year, has been instrumental in mentoring and supporting student-led innovations from ideation to startup formation. Over the past decade, VJIT students have actively participated in the **JNTU-H EXCITE Design Workshops**, conducted in collaboration with **HYSEA** and **TASK**, winning numerous awards and receiving **seed funding** for their innovative projects.

### Incubation and Industry Collaboration

VJIT houses several **on-campus incubation centers** and **collaborates with national and international organizations** to promote innovation and entrepreneurship. Key incubation and partnership networks include:

- **MSME-recognized Incubation Center**
- **Confederation of Indian Industry (CII)**
- **Wallaga University, Etheopia**
- **Association of Lady Entrepreneurs of India (ALEAP WE-HUB), Hyderabad**
- **The Copperbelt University, Zambia**
- **Faculty of applied logistic and polymer sciences university of applied sciences kaiserslautern Pirmasens, Germany**

These collaborations provide invaluable exposure, mentorship, funding avenues, and access to global entrepreneurial networks for budding innovators.

### Institute Innovation Council (IIC)

VJIT has established an **Institute Innovation Council (IIC)** in collaboration with the **Ministry of Human Resource Development's Innovation Cell (MIC)** to promote a vibrant innovation culture on campus. The IIC serves as a platform to support students and faculty in developing creative ideas into scalable ventures.

Under this initiative, the institute organized the **MHRD IIC Industrial Talk Series**, featuring expert speakers and interactive sessions. Active participation from students and faculty members demonstrated the institution's strong innovation-driven ethos. Additionally, the IIC conducted a **workshop on Intellectual Property Rights (IPR)** to raise awareness on patent filing procedures, legal frameworks, and the importance of protecting innovations.

## Progress Report 2024-25

### National Innovation and Startup Policy (NISP)

VJIT has adopted the **National Innovation and Startup Policy (NISP)** with the aim of positioning the institute as a **hub for startups, entrepreneurship, IPR ownership, technology licensing, and equity sharing in startups**, with a strong emphasis on **rural enterprise development**.

The policy promotes a comprehensive entrepreneurial ecosystem that identifies, mentors, and nurtures the innovative capacities of students, faculty, and staff. It provides strategic support in the form of **funding opportunities, investment connections, incubation, and networking platforms**, ensuring that innovative ideas are transformed into successful ventures.

### Intellectual Property Rights (IPR) Cell

The **IPR Cell** at VJIT is a proactive initiative that encourages the **filing of patents and protection of innovations** developed within the institute. It serves as a resourceful platform for faculty members, students, and research scholars to learn about intellectual property, share their work, and stay updated on the latest developments in the field.

The cell offers **practical exposure, awareness programs, and consultation services** to help innovators navigate the patenting process and ensure legal protection for their technologies. By institutionalizing the culture of innovation and IPR, the cell not only enhances the academic profile of the institute but also contributes meaningfully to societal advancement.

### 1.7 Faculty Development Programmes and Achievements

#### 1.7.1 Faculty Development Programmes

Faculty members are widely regarded as the most valuable resource in any institution of higher education, serving as the primary facilitators of knowledge and skill development for students. At the Engineering Institute, faculty are increasingly expected to be innovative educators and effective mediators between students and knowledge. These expectations stem from evolving curricula and the demands of a competitive industry. As a result, faculty must now acquire new knowledge and a diverse skill set—including managing multiple roles, mentoring, and integrating technology into teaching, learning, and research. Mastery of emerging ICT tools has also become essential.

At VJIT, Faculty Development Programs (FDPs) have evolved from focusing on qualification enhancement to emphasizing overall quality enrichment. These programs are designed to equip faculty with the tools needed to navigate the rapid changes and emerging trends in engineering education. The FDPs organized in the academic year 2022–23 have been instrumental in further honing teaching effectiveness.

**Table 1.16: FDP/Workshops/ Seminars Conducted by VJIT in AY: 2024-25**

Department	Title of the professional development program organised for teaching staff	Dates (from-to) (DD-MM-YYYY)	No. of participants
CSE	3 day FDP on "UI design Flutter	19-6-2024 to 20-07-2024	43
CSE	A Seminar on Full stack & Mern stack development	12-08-2024 to 12-08-2024	45
CSE	Workshop on Design Thing with AI	08-02-2025 to 08-02-2025	46

## Progress Report 2024-25

CSE	Guest Lecture on From data To Decision: Practical applications of Data Science	16-10-2024 to 16-10-2024	43
CSE	FDP on "Artificial Intelligence for geospatial data Analysis	22-11-2024 to 22-11-2024	42
CSE	6 day skillenhancement program on "IOT with Drones"	28-01-2025 to 01-02-2025	58
CSE	A session on Outcome Based Education	04-02-2025 to 04-02-2025	41
CSE	A Customized Research Paper Writing and Book Chapter Development	17-05-2025 to 17-05-2025	52
CSE	An international conference on "Datascience and Artificial Intelligence 2025"	24-06-2025 to 26-06-2025	50
CE	Technical Talk on Advancements and sustainable trends in construction practices and materials	04-04-2025 to 04-04-2025	15
CE	Technical talk on Very Amazing Concrete	05-09-2024 to 05-09-2024	12
CE	Online International webinar on Red mud characterization and stabilization using amendments	21-08-2024 to 21-08-2024	18
CE	A Technical Talk on Significance of Geotechnical Investigation in Infrastructure Projects	14-08-2024 to 14-08-2024	15
IT	"Future of AI with General adversarial Networks"	21-10-2024 to 25-10-2024	40
IT	"Role of Big data and cloud in the Era of Transformation"	16-12-2024 to 20-12-2024	20
IT	"Cloud Infrastructure and its services"	05-08-2024 to 09-08-2024	20
ECE	One day workshop on "Innovation and Entrepreneurship for career opportunities"	23-07-2024 to 23-07-2024	20
ECE	International Conference On "Innovations in Communication and Informatics".	28-11-2024 to 30-11-2024	110
ECE	A Two day Awareness Program on Assessment of "Course Outcome (CO) and Program Outcome (PO) Attainment"	24-02-2025 to 24-02-2025	51
ECE	A Two day Workshop on "Internet of Things (IoT)"	04-03-2025 to 05-03-2025	95
ECE	The Role and opportunities for Women in space	01-05-2025 to 01-05-2025	120
	Awareness Program on "Outcome based Education"	24-03-2025 to 24-03-2025	45
H&S	FDP: Spectroscopic studies - An overview	30-08-2024 to 30-08-2024	16
H&S	FDP: New trends in Mathematical Sciences	20-09-2024 to 20-09-2024	18
H&S	FDP: Role of AI in enhancing communication skills	29-11-2024 to 29-11-2024	24
H&S	FDP: Advantages and applications of composites	07-02-2025 to 07-02-2025	19
H&S	Workshop: Hands on experience with electronic instrumentation	28-03-2025 to 28-03-2025	22

## Progress Report 2024-25

H&S	Workshop: Advanced excel for data analysis	20-12-2024 to 20-12-2024	24
Mech.	FDP on Fusion 360 fundamentals	18-11-2024 to 18-11-2024	16
Mech.	Mastering Project Management: A 2-Day FDP on PERT and CPM Techniques	03-02-2025 to 04-02-2025	15
Mech.	Advances in CNC Machining: A Faculty Development Program	26-04-2025 to 26-05-2025	18
EEE	Cyber Security Challenges, Detection and Mitigation Techniques for Smart Grids	22-07-2024 to 24-07-2024	32
EEE	Two day FDP on Harnessing Renewable Energy Sources through Innovative Strategies for Effective Implementation	10-09-2024 to 12-09-2024	30
EEE	-	29-11-2024 to 30-11-2024	6
EEE	Artificial intelligence and ICT application to power system protection	06-01-2025 to 08-07-2025	22
EEE	Grid Power Electronics Technology	03-04-2025 to 05-04-2025	21
EEE	-	26-05-2025 to 27-05-2025	4
MBA	A one-day workshop will focus on writing proposals for funded projects, with a special emphasis on ICSSR longitudinal and special projects.	28-09-2024 to 28-09-2024	13
MBA	A two-day FDP on Empowering Faculty with Intellectual Property Rights and AI Tools for Innovation and Excellence	22-11-2024 to 23-11-2024	13
MBA	One-Day Workshop on Academic Writing: Ethical Issues	08-01-2025 to 08-01-2025	12
MBA	Two-day FDP on Case Study Excellence: From Fundamentals to Advanced Strategies/Active Teaching & Learning in the Digital Age	23-04-2025 to 24-04-2025	12
AI	6 Day Online Faculty Development Program on The Revolution of Large Language Models (LLMs) in Artificial Intelligence	18-11-2024 to 23-11-2024	369

**Table 1.17: Conferences Conducted by VJIT in AY: 2024-25**

S. No	Department	Conference Title	Duration
1	ECE	International Conference in Innovations in Communication and Informatics	28 <sup>th</sup> -30 <sup>th</sup> November 2024
2	CSE	Data Science and Artificial Intelligence (ICDSAI) 2025 in Collaboration with California State University (CSUSB), USA	24 <sup>th</sup> to 26 <sup>th</sup> June 2025

## Progress Report 2024-25

3	Mechanical Engineering	Proceedings of National Conference on Recent Trends in Mechanical Engineering (RTME-2025)	25 <sup>th</sup> to 26 <sup>th</sup> April 2025
4	CSE & Allied Computer Science Branches	CSI State Convention on Generative AI	6 <sup>th</sup> to 7 <sup>th</sup> March 2025

## Progress Report 2024-25

### 1.8.5 Mentoring System

VJIT believes that mentoring system has a positive impact on students' continuous progress and achievement. Hence, Institute has adopted effective mentoring system for the development of its students. Our experienced faculties establish a positive and constructive relationship with the students to foster their personal and professional growth.

Our mentoring system has shown a tremendous change in the students' ability to reach their goals and realize their dreams. This was possible by maintaining a positive classroom atmosphere, in which the faculty are quite approachable to the students and they successfully reinforce learning skills by alleviating students' mental blocks. The students have always looked up to our faculty who have been serving as role models sharing their personal experiences and history of their careers.

- The results achieved by our students are a perfect example of our sound mentoring system; the results being both output and outcome-based.
- Increasing student attendance percentage is yet another milestone in our mentoring system.
- Students' keen interest in curricular, co-curricular and extra-curricular activities, their active participation in various student clubs to enhance their personality is another achievement of our robust mentoring system.

VJIT also promotes psychosocial mentoring system to boost the confidence levels of its future professionals. Our able faculty serves as a consistent source of advice and support to the students to build self-confidence and self-esteem by motivating an open talk about their fears and anxiety that hinder their concentration on academics. A deep insight into the multiple backgrounds of the students that inflict their academic development has helped us to counsel them to overcome their insecurities. This has been a focal point of our strong and efficacious mentoring system. Another major area of focus in mentoring system is the academic/career factor. We have been active listeners to the students who project a plethora of ideas and have been extending our support to them in exploring a range of opportunities and possibilities, thereby strongly supporting them in critical decision-making. It is our primary responsibility to explore suitable, sustainable academic and career options hand-in-hand with the students and helping them overcome their stigma about their abilities. The motto of our mentoring system is the viable student-faculty interaction for a persistent development of our students.

#### **Mentoring system to help at individual level:**

**Types of mentoring:** All round mentoring

**Frequency of Meetings:** Fortnight (and need based)

## Progress Report 2024-25

### Mentoring process

Mentoring is for overall development of the student. Counseling books are maintained by faculty where all details of the students are recorded. The following details are maintained in the counseling book of each student:

- Personal Information
- Past Academic Performance
- List of academic achievements
- Monthly attendance

The mentors will meet the students periodically and monitor their performance and their progress. Guidance is given to students for the improvement. The followings are take care by each mentor.

- Monitoring Regularity of the students.
- Monitoring Performance of the students.
- Personal Counseling for Career Guidance
- The parents of poorly performing students are informed through SMS and call.
- Students are encouraged to participate in technical events.

The Training & Placement (T&P) Cell at VJIT plays a pivotal role in shaping the careers of students by equipping them with the necessary skills and facilitating placement opportunities. Each year, students participate in 80 to 100 on-campus and off-campus placement drives, with approximately 80% of eligible students getting placed in reputed companies.

To meet the evolving demands of the industry and transform students into industry-ready professionals, the T&P Cell conducts a wide array of activities, including:

- Technical and Soft Skills Training
- Workshops and Guest Lectures
- Alumni Interaction Sessions
- Mock Interviews
- Online and Offline Assessments

##### Training Structure

- Engineering Students: Training begins from the 2nd year and continues upto to the 4th year.
- MBA Students: Training is primarily conducted during the 1st year.
- Placement Drives: For B.Tech students, recruitment begins at the end of the 3rd semester and continues up to the 8th semester.

##### Internships & Industry Collaboration

In collaboration with the Institution-Industry Interface (III) Cell, the T&P Cell actively facilitates internship opportunities during the 8th semester. The Cell also drives industry partnerships and MoUs with leading companies to enhance student exposure and learning. Centers of Excellence at VJIT resulting from these collaborations include:

- Virtusa CoE in Software Testing
- Qlik CoE in Data Analytics

##### Training Partners & Platforms

## 2. Research and Development Activities

### 2.1 Research and Promotion Policy

VJIT constructively focuses on Innovations by faculty and students and groom them for research and development as a stepping stones to reach the institute vision in the key area on Engineering and Management. The Main aim of Research & Development Centre at the Institution level is to promote Research & Innovation among the faculty & students that helps for a social cause. Dr. D. Arunakumari Professor, Department of Computer science Engineering is the Institutional Research Co-ordinator of the Centre. The R&D Centre of the college works in three distinct aspects viz., pursuing Academic and sponsored research, bringing innovation from engineering and imparting standards among all the research pursued. To promote research and innovation, many new centres of excellence and innovative labs have been established. The best research practices and ideas are shared amongst departments. R&D Center involves in identifying thrust

areas on research, developing projects leading to publications in National/International Journals and conferences. The centre helps in developing co-operative and complimentary research among various Departments under VJIT to explore advanced technologies. The Centre holds periodical Review meetings on the progress of research being carried out by staffs and students. The Center also renders help to pursue funded projects once it is sanctioned. The Centre also guides in writing projects, to culminate in filing patents.

Treading this path, the Institution evinced interest in research amongst the students from first year of their study. Necessary environment and facilities were created. Centralized labs/design centers titled propel labs were established. These labs are broad based and not confined to a single area/discipline. Student groups (multidisciplinary) work on various engineering projects in these labs - concept to designing the prototype. The labs are open for students of all disciplines. Each Lab is headed by a faculty and supported by competent technical staff who volunteers to act as mentors for the students and ensure that students conduct the research. Currently about 300 students are working in these labs. Creative thinking skills of the students and mentoring by faculty guides result in development creating systematic processes and products. These research labs help the students to build prototypes which enable them to participate in competitions both in India & Abroad.

The aims and objectives of VJIT Research & Development Centre is enumerated hereunder:

- Encourage Faculty and students to take up research
- Monitor activities of centers of excellence/innovative labs/incubation centers
- Collaboration with foreign universities for Research activities
- Facilitate management grants/incentives for promoting research
- Assist in patenting
- Conducting research conclaves

Some of the unique research facilities created are shown here under:

- ICI Knowledge Center
- Nano Materials Synthesis laboratory.
- NI LABview Academy school
- Cypress semiconductors Center of excellence on Embedded & IoT

The institution has introduced number of Initiatives towards Promoting Research activities in the institution.

- Cash incentives for research publications in refereed journals
- Management funded Research Promotion Scheme
- Deputation of faculty to participate in Workshop, seminar and conferences
- Financial assistance to faculty for presenting technical papers in national, international conferences/seminars
- Centers of excellence/Innovative labs/Incubation centers
- Incentives for faculty for fetching external research grants
  
- MSME incubation center to facilitate consultancy activities
- Supporting measures for patent filing
- Continuous augmentation of labs with state of art equipment and software
- Incentive Scheme for Research Activities:
  - The Management has implemented the following incentive scheme to the faculty to promote research activities.
    - a) Annual Book Allowance of Rs.2000/-
    - b) Full Annual membership fee for Indian Professional Body in their respective domain
    - c) 75% of the Annual Membership Fee for a Foreign Professional Body in their Respective Domain.
    - d) The Annual expenditure in lieu of extending all the above benefits shall put together not exceed Rs.15, 000/- Per faculty.
- Collaboration with Core industries for Research activities
- Cash incentive for writing technical & literature Books
- Incentives for faculty for fetching external research grants

### Research Hierarchy

## Progress Report 2024-25

**Organizational Chart of R & D**

### Roles and Responsibilities of R & D Cell

#### The Role of R & D Cell:

#### Objectives:

- To enhance the Research Ecosystem of the college
- To promote Academic Research in the college with Faculty and students
- To preserve the Code of ethics of the college while publishing
- To help the faculty in applying for funds in the form of Sponsored research / Grants from government and non government agencies
- To pave path for the teachers, students and researchers to collaborate for research

#### Responsibilities of R & D Cell

To help faculty, researchers and students to

- Know research methodology
- Methodology to develop projects
- Process of converting projects into prototype and in turn into products

## Progress Report 2024-25

- Enhancing their knowledge on Intellectual property rights and Patents
- Preserve code of ethics while publishing papers / thesis
- Conduct skill development courses that enhancing the capability of students and Faculty.

### Intellectual Property Rights Cell (IPR)

#### Objectives of IPR Cell:

- To provide IPR Information in Protection with Orientation to Faculty & Students.
- To guide & advise Researchers on how to obtain & sustain Patents with IPR Cell.
- To facilitate routing of Patent searchers through IPR.
- To get necessary clearances from competent authorities while filling Patents and other IPRs like Copyrights Registration and Design Registration, etc. through IPR Cell.
- To evolve the procedures for commercialization of Patented Technologies with Students and Faculty.
- To organize various IPR awareness Programmes in Collaboration with Research Organization in VJIT Campus.

#### 4 EXTENSION ACTIVITIES UNDERTAKEN

##### 4.1 Entrepreneur Development Cell (EDC) / Institution Innovation Council (IIC)

EDC of the institute is committed to the cause of encouraging entrepreneurship among students. The cell invites various renowned entrepreneurs to share their experiences. Lectures and awareness programs are regularly conducted to enlighten the students about the joys and

## Progress Report 2024-25

problems of entrepreneurship. Guest lectures are conducted throughout the year to involve the students in the various activities.

### Objectives of EDC

- To organize Entrepreneurship Awareness Camps, Entrepreneurship Development Programs, Faculty Development Programs and Skill Development Programs in the college/institution for the benefit of students
- To motivate and develop entrepreneurship among the students
- To initiate innovative student projects each year for new innovative product development
- To arrange interaction with entrepreneurs and create a mentorship scheme for student entrepreneurs
- To facilitate creation of entrepreneur's club in each college to foster the culture of entrepreneurship amongst students
